BACKGROUND, OVERVIEW AND SCOPE OF REQUIREMENTS

1 BACKGROUND

The purpose of the contract for the provision of Property Acquisition and land identification Services.

2 EXECUTIVE OVERVIEW

SANRAL seek to appoint a Service Provider for the provision of property acquisition and land identification services to enable the Employer to acquire new property for road reserves, and where applicable, rights in property to be able to establish new road infrastructure or improve and widen existing road infrastructure. A further purpose is to identify the underlying properties on roads that were either obtained by the Employer and its predecessors or by other governmental entities before it became a requirement to transfer land and to ensure an up to date Asset Register for SANRAL.

Interested experienced parties are to provide a full range of property related services under one contract. The services to be provided can broadly be categorised as follows:

1. Surveying
2. Land Surveying
3. Property acquisition
4. Identifying and establishing legal causa for ownership
5. Valuation of property for acquisition
6. Negotiations
7. Conveyancing
8. Reporting
9. Accountancy
10. Mentoring of SANRAL staff
11. Training of staff for purposes of obtaining Professional status
12. Town Planning services
13. SPLUMA applications and rezoning
14. Environmental requirements not performed by SANRAL in regard to acquisitions

3 SCOPE OF REQUIREMENTS

3.1 Nature of Works

The description of the project contained in this section is merely an outline of the services and shall not limit the work to be carried out by the Service Provider under this contract. Approximate quantities of each type of work to be carried out in accordance with the contract documents are listed in the Bill of Quantities bound in this volume.

The Service Provider shall be required to attend meetings relating to the project.

3.2 Detailed description of the project

The sequence of services to be provided in terms of the contract are best shown in the form of a series of diagrams.

LAND ACQUISITION AND LAND IDENTIFICATION

LAND ACQUISITION PROJECT MANAGEMENT

SURVEY

CONVEYANCING

3.3 Detailed description of the project

The Service Provider will be required to plan its daily business and operations in accordance with the land acquisition programme (LAC). This programme, which must be updated monthly and will be discussed in monthly meetings between the Service Provider and the Employer, provides guidance to the Service Provider as well as offers the Employer a method by which the performance of the Service Provider is able to be measured on a regular basis. It is to be included in PIMS, which the acronym for Integrated Transport Information System and which is the computer interface that the Service Provider is required to use on a daily basis to enter data, generate reports, measure progress and coordinate the various aspects of the Service Provider's work. Each user of the interface will be required to register on the system. Guidance in the use of the system is provided in the ITIS guidelines.

The Service Provider shall be required to adhere to the requirements of Occupational Health and Safety legislation and be especially prudent to maintain safety procedures whenever staff travels and works alongside roads doing valuations and surveys. A specialist in the field must be in the employ of the Service Provider.

The Service Provider must note that any erroneous work produced will be required to be corrected at its own cost.

The Service Provider must note that accuracy of data is paramount, and that work must be carried out within the accuracies and tolerances generally accepted by and adhered to by the members of professional bodies which govern the work disciplines to be involved in the contract.

Payments will be made monthly to the Service Provider upon the presentation of detailed monthly certificates, and where indicated in the specifications, must be supported by copies of invoices of actual expenses incurred. Remuneration will be based on the principle of payment being made for all work done to date, less all previous

payments. This method is entirely "self-healing" in the sense that any accuracies of measurement are automatically corrected in later claims, without the need for credits and debits to be made, which complicate accounting.

Unless otherwise indicated in the specifications, travelling time is not paid for, but travel and subsistence costs will be paid for.

The Service Provider's attention is drawn to the numerous Acts and Regulations that apply to the various disciplines of work to be carried out. In addition, it must be noted that the Employer is a State owned enterprise that operates as a Proprietary Limited Company, and as a result is governed by such legislation as the Treasury Regulations, the Preferential Procurement Act and others more fully described in the Specifications, or which may be applicable without reference to them in the Specifications.

The Service Provider shall be required to develop and implement documented procedures as part of its Quality Management system for the approval of the Employer. When approved, these documents shall be deemed to have become part of the Specifications and shall form part of the obligations of the Service Provider. Whilst ITIS is a system that maintains certain checks and balances and is approved of and regarded by the Auditor-General as the definitive record of the Employer's land portfolio, the Service Provider shall maintain adequate skills, training levels, quality management procedures and information technology resources to ensure that by the time data is entered into ITIS, it is of such a quality that it will withstand any enquiry into its reliability as a source of accurate information. The Employer retains the right, at any time, to require of the Service Provider to produce its quality management procedures to provide evidence of its diligence with regard to quality management. In order to be able to deal with audit queries, the Service Provider shall provide the Employer with copies of its quality management system and shall accept that these documents may be used verbatim, or in an adapted form to further enhance the specifications of future contracts.

The Service Provider shall maintain a risk register for the purposes of mitigating any risks identified to potentially affect the business of the Service Provider and that of the Employer.

The Service Provider shall be required to produce regular reports and summaries of work planned, work in progress and work completed. Although most of these reports will be able to be generated by the ITIS system, the Service Provider will be required to produce other reports, such as financial reports and reports of actions taken during the carrying out of its duties from its own records, and make data transfers to the Employer.

Although it is a requirement that acquisitions may only commence upon the issuing by the Employer of a signed property report and acquisition diagram, it may happen that land acquisitions are instructed to commence before engineering design work is a complete, and changes to land requirements become required. The specifications have been so written as to cater, as far as is practical, for work that is commenced and later stopped, with new requirements then being instated.

The Service Provider shall be required to manage and fully coordinate the functions performed by all disciplines of expertise involved in the provision of the property services envisaged in this contract, to ensure that programmes and workflow are carried out smoothly, that there are no discrepancies in reporting, and that the data entered into the ITIS system is consistent, accurate, valid and verified.

All data collected by the Service Provider belongs to the Employer and shall not be disclosed to third parties without the knowledge and permission of the Employer and may not be used to place the Service Provider in any position of advantage during or after the termination of the contract. Any transgression of this requirement may be adequate reason for the Employer to terminate the contract.

The Service Provider shall be required to maintain high ethical and professional standards in the carrying out of its duties, actively combat any form of fraud or corruption and shall avoid placing the Employer in any embarrassing or untenable position. The Service Provider shall pursue the objectives of creating fair competition in the property sector, always strive to obtain fair value for money and efficiency and observe the highest levels of corporate governance.

Other than is provided for in the Establishment and Time Related Costs section of the General Specifications for Property Acquisition and Land Identification Services, no specific mention is made of day to day administration, staffing, offices, office equipment, profit, etc, and neither are these items measured and paid for separately, as these costs are deemed to be covered by the rates tendered.

The Service Provider must note that certain targets are set in the Specifications for work that must be carried out by subcontractors of the Service Provider. The purpose of these targets is twofold, firstly to provide the Service Provider with a known quantity of work that will keep its employees fully occupied and which will enable peaks in workload to be performed by others and, secondly, to provide for transformation and the engaging of black enterprises and individuals that would otherwise have insufficient resources to tender for and perform the whole of the works. This will require of the Tenderer to sub-contract 20% of all survey and valuation services as a minimum, as well as 75% for conveyancing. The Tenderer will also be obliged to perform mentoring and training to enable SANRAL staff and other staff of the Tenderer to obtain Professional Status. An overall percentage of 30% of subcontracting must be adhered to.

The service provider will be required to provide training, mentoring, quality management and experiential training management as part of its duties under the contract. An important feature of the contract is the management of the improvement of construction site surveying and providing an environment for especially surveying graduates to gain the necessary experience to allow them to register as professionals. The Service Provider is also required to prepare training material and deliver training courses for the various purposes described in the specifications.

The contract provides for two transition periods; one to pick up the services from the previous Service Provider and another to terminate and hand-over the services to the next Service Provider. It must be noted that at the beginning of this contract, the Service Provider shall be obliged to hire the previous Service Provider in the guise of a nominated subcontractor until the handover has been completed, which is expected to last 3 months, but may extend to four months because of the Christmas period.

A period will follow during which the contractor conducts its business under probation, as described in the Agreement.

Once the Contractor has successfully completed its probationary period, it will be required to fully provide the services described and specified until three months before the termination of the contract.

Within the last three months of the contract, the Service Provider will be required to wind down its operations in accordance with a pre-programmed plan and hand over the services rendered to a new Service Provider that will be appointed after a further tendering process.

The documents and files belonging to the Employer are required to be managed by the Service Provider. A list of available file numbers is provided and must be adhered to, while the requirements of the National Archives and Records Service must be followed.

Certain registers aimed at tracking the flow of documentation between the Employer and Service Provider must be kept up to date.

Provision is made for the reimbursement of travel and subsistence expenses incurred in the course of carrying out the duties of the Service Provider.

Annual and monthly budgeting and financial record keeping, and control requirements must be adhered to at all times.

Penalties will be imposed on the Service Provider for a variety of failures to conduct its business to the satisfaction of the Employer.

3.4 Requirements in respect of surveys

As is more fully described in the Specifications, the Service Provider shall be required to;

1. Source Property information,
2. Perform Land Identification, and transfer the properties over which the Employer has real rights, to the Employer,
3. Maintain and update pro-forma tender documentation for the procurement of all topographical, engineering and photogrammetric surveys,

4. Maintain and update documents including but not limited to the Technical Methods for Highway 11 (TMH11), the N14/5/6 Manual, the Land Acquisition Guideline Manual, and to assist, if called upon to do so, with the implementation of SAP,
5. Compile cadastral / acquisition / subdivision / declaration and land identification compilation key plans,
6. Frame acquisition diagrams for the acquisition of land,
7. Frame and amend declaration sketches,
8. Undertake subdivision surveys,
9. Provide a comprehensive management administration and co-ordination function,
10. Maintain all survey registers,
11. Update and maintain the Employer's Land Information System (GIS),
12. Provide project management services and quality management on surveys that are outsourced by the Service Provider and by engineering consultants,
13. Undertake other survey work, and survey related work at the request of the Employer,

The Service Provider shall be required to programme surveying work in accordance with the LAC programme and any other programme of work required to be undertaken by the Service Provider.

Accuracy of surveying is of paramount importance and the Service Provider shall be diligent in controlling and managing the services rendered by subcontractors. As the GIS system of the Employer cannot be expected to be entirely failproof in identifying and indicating faulty data to the users of the system, it shall always remain the responsibility of the Service Provider to ensure that data entered into the system is of the highest quality and in conformance with the requirements of the land surveying profession.

3.5 Requirements in respect of property acquisition

The Service Provider's duties shall include, inter alia;

1. Acquiring State or Tribal Land,
2. Acquiring privately owned property,
3. Update data on ITIS, prepare programmes, produce reports and perform management.

3.6 Requirements in respect of valuation

Valuation work will be required for the purposes of acquiring properties and real rights by negotiation or, in exceptional cases, by expropriation. Provision is also made for assisting and advising design engineers to avoid costly acquisitions wherever possible and for valuers to assist the Employer during court proceedings.

It will be expected of the Service Provider to ensure that, prior to dispatching a valuer to carry out any valuation, all information relating to the property to be valued is correct, complete and clearly documented so as to avoid any conflict or embarrassment of the Employer or valuer when valuations and agreements are discussed with landowners.

3.7 Requirements in respect of the use of ITIS

The repository of all property related data shall be the Employer's computer database, accessed through the ITIS interface. The Service Provider shall be furnished, at no cost, with adequate licensed software to enable it to enter data into the Employer's database (Oracle, with spatial cartridge), view it graphically through the GIS system (at present, GeoMedia) and to record documentation into the Employer's document management system (EDMS).

Data is displayed by means of a GIS, which is the best way of identifying data that is spatially incorrect and provides scope for a variety of facilities for viewing data graphically, or in tabular form.

The system is capable of producing numerous reports which have been coded into the system. It is possible for the Service Provider to have other reports suited to its particular needs programmed into ITIS. Requests for new reports must be discussed with the Employer, who, in its sole discretion, may accede to or refuse any request for a new report.

The Service Provider must note that ITIS shall be available at least 95% of time between 08h00 and 17h00, Monday to Friday and that any problems with the system will be dealt with as soon as is possible by the Employer. Although attention to problems cannot be guaranteed after hours, access to the system will still be possible. The Service Provider shall note that downtime shall only be measured from the time at which any problems are reported to the Employer.

Although ITIS is by no means failproof and will not warn the user of erroneous input in respect of all data, it includes a variety of quality management features that will alert the Service Provider of data that does not meet with data tests defined by the Employer. Quality management, accuracy and quality control shall always remain the ultimate responsibility of the Service Provider.

Upon commencement of the contract, the Service Provider shall be required to attend training on the use of ITIS and familiarise itself with the data that is contained on the database behind the ITIS interface.

The Employer has developed a comprehensive information management tool called ITIS (Integrated Transportation Information System) to address all facets of its strategic and tactical planning, design, construction and maintenance of the entire road network. This provides support for the management tasks of the Employer and to allow the personnel to make technical decisions more quickly and efficiently.

ITIS is an integrated approach to the sharing and inter-relating of technical performance information for the Employer and relies on people following procedures to populate the system with data. ITIS currently consist of the following platforms:

1. **ITIS Web** – Web enabled portal providing online access to various functions, workflows and reports.
2. **ITIS Desktop** – Offline data capture tool enabling the capture of information offline, validation and then synchronisation of data with the ITIS database.
3. **ITIS Mobile** – Application (Android 6 or later) that allows the in-field capture of information using a smart phone or tablet (must have camera and GPS), validation and then synchronisation of data with the ITIS database.

The Employer has several ITIS modules running on any of the above ITIS platforms which affect the Service Provider, who will need to use these modules to perform certain procedures and to provide required information. The current modules applicable to property and their description are as follows:

1. The preparation and submission of drawings,
2. The land Information desktop user guide,
3. The land Information web user guide,
4. Specifications for the land module,
5. Land register user manual.
6. The Employer is implementing SAP, which may result in new user interfaces being created, and new requirements for the submission of data being required. The Service Provider may be required to assist the Employer to develop these features and will be paid for its time doing so at the tendered rates.

Total Points		100

The minimum number of evaluation points for quality evaluation criteria is not less than **75 points**. The tenderer/s that meet the minimum points will be evaluated further in terms of price and preference points as stated.

The minimum threshold for technical/functionality [Step TWO] must be met or exceeded for a Respondent's Proposal to progress to Step THREE for final evaluation

4.3 STEP THREE: Evaluation and Final Weighted Scoring

a) Price and Specific Goal

SANRAL will utilise the following formula in its evaluation of Price:

$$PS = 80 \left(1 - \frac{Pt - P_{min}}{P_{min}} \right) \quad \text{or} \quad PS = 90 \left(1 - \frac{Pt - P_{min}}{P_{min}} \right)$$

Where:

Ps = Score for the Bid under consideration

Pt = Price of Bid under consideration

P_{min} = Price of lowest acceptable Bid

Specific goals	Criteria	10 points		20 points	
		Point allocation	Maximum points	Point allocation	Maximum points
B-BBEE Level	Level 1	10.00	10.00	20.00	20.00
	Level 2	9.00		18.00	
	Level 3	6.00		14.00	
	Level 4	5.00		12.00	
	Level 5	4.00		8.00	
	Level 6	3.00		6.00	
	Level 7	2.00		4.00	
	Level 8	1.00		2.00	
	Non-compliant contributor	0.00		0.00	

b) **Specific Goals** [Weighted score 20 point]

- Specific goals preference points claim form
- Preference points will be awarded to a bidder for attaining the specific goals requirements in accordance with the table indicated in the specific goals Claim Form.

4.4 STEP FOUR: Post Tender Negotiations (if applicable)

- Respondents are to note that SANRAL may not award a contract if the price offered is not market-related. In this regard, SANRAL reserves the right to engage in PTN with the view to achieving a market-related price or to cancel the tender. Negotiations will be done in a sequential manner i.e.:
 - first negotiate with the highest ranked bidder or cancel the bid, should such negotiations fail,
 - negotiate with the 2nd and 3rd ranked bidders (if required) in a sequential manner.
- In the event of any Respondent being notified of such short-listed/preferred bidder status, his/her bid, as well as any subsequent negotiated best and final offers (BAFO), will automatically be deemed to remain valid during the negotiation period and until the ultimate award of business.
- Should SANRAL conduct post tender negotiations, Respondents will be requested to provide their best and final offers to SANRAL based on such negotiations. Where a market related price has been achieved through negotiation, the contract will be awarded to the successful Respondent(s).

4.5 STEP FIVE: Award of business and conclusion of contract

- Immediately after approval to award the contract has been received, the successful or preferred bidder(s) will be informed of the acceptance of his/their Quotation by way of a Letter of Award. Thereafter the final contract will be concluded with the successful Respondent(s).
- Otherwise, a final contract will be concluded and entered into with the successful Bidder at the acceptance of a letter of award by the Respondent.

Respondents are to note that, on award of business, SANRAL is required to publish the tendered prices of the successful and unsuccessful Respondents *inter alia* on the National Treasury e-Tender Publication Portal, (www.etenders.gov.za), as required per National Treasury Instruction Note 01 of 2015/2016. **[This is not applicable if RFT was not advertised on National Treasury e-Tender Publication Portal]**

Respondents declaring a commercial relationship with a DPIIP or FPPO are to note that SANRAL is required to annually publish on its website a list of all business contracts entered into with DPIIP or FPPO. This list will include successful Respondents, if applicable.
