1. INTRODUCTION

The South African Local Government Association (SALGA) is an Organ of State established by its members and recognised through the Organised Local Government Act (Act 52 of 1997) to assist in the comprehensive transformation of local government in South Africa. SALGA has opted to manage its planning and reporting processes within the Revised Framework for Strategic and Annual Performance Plans as published by the Department of Planning, Monitoring and Evaluation.

2. SALGA MANDATE

Developmental Local Government is an essential component of the machinery of government. In accordance with its constitutional mandate, SALGA is obliged to transform the local government sector to one that has the required capacity to make a meaningful contribution to poverty alleviation, economic development and all socio-economic opportunities that the state has geared itself to provide for its people. SALGA also serves as the representative voice of all 257 municipalities in the country. For the past 30 years, since its establishment, SALGA has endeavoured to bring focus to its mandate of supporting local government transformation in a complex environment, characterised by a highly diverse and diffuse membership-base of municipalities. In terms of its amended Constitution, SALGA is a unitary body that consists of a national association and nine provincial offices. Its mandate rests on six primary pillars:

- **Representation, Advocacy and Lobbying** refer to representing the interests of members in legislatures and other policy making and oversight structures. It also refers to engaging with various stakeholders, public debates etc. in the interest of Local Government.
- **Employer Body** refers to being an effective employer representative for members. Employer representation is carried out through collective bargaining (in terms of the Labour Relations Act) in various structures including but not limited to those established in the South African Local Government Bargaining Council.
- **Capacity Building** refers to facilitating capacity building initiatives through among others, representing member interests in the Local Government Sector Education Authority (LGSETA). SALGA strives to facilitate a coherent, well-co-ordinated capacity building programme for municipal councillors and officials.
- **Support and Advice** refer to the provision of tools and services that enable municipalities to understand and interpret trends, policies and legislation affecting Local Government and to implement the said policies and plans.

- **Strategic Profiling** of Local Government refers to enhancing the profile and image of local government as an important and credible agent for the delivery of services. Profiling focuses within South Africa, the African continent and the rest of the world.
- **Knowledge and Information Sharing** refer to building and sharing a comprehensive hub of Local Government knowledge and intelligence that will enable informed delivery of other SALGA mandates. The knowledge hub is also a useful reference point for all who seek Local Government information.

3. BACKGROUND CONTEXT

3.1 SALGA 5-Year Strategic Plan

As SALGA approaches the final phase of its 2022–2027 strategic plan, it is imperative to begin preparations for the forthcoming term of office. This transition presents an opportune moment to propose a robust strategic agenda for the 2027–2032 period, ensuring continuity, innovation, and responsiveness in local governance.

Currently, SALGA is working towards the final leg of its 2022–2027 strategy, a period marked by significant progress and lessons learned in advancing municipal excellence and developmental priorities. The imminent shift to the next strategic cycle necessitates a careful review of ongoing initiatives and a forward-looking approach to address emerging challenges and opportunities within the local government sphere.

Several critical developments are shaping the environment in which SALGA operates. Notably, the review of the White Paper on Local Government is underway, signalling potential policy reforms and a renewed vision for the sector. Alongside this, the review of the local government funding model is poised to influence the financial sustainability and effectiveness of municipalities, underscoring the importance of resource allocation and fiscal management in achieving developmental objectives.

3.2 Situational Analysis

A situational analysis is the process used to collect, evaluate and organise information regarding the organisation's internal and external environments. Various and multiple frameworks can be applied to conduct a situational analysis for strategic planning. The service provider should be mindful of identifying frameworks and models that would be best suited in the public sector and policy environments, considering its approach in reframing internal negatives as constraints to be managed and emphasis on context, structural realities, and resourcing.

Insights gained from this situational analysis would ensure that SALGA's strategy is dictated by the realities of the environment in which it operates in. Resultantly, there will be strategic alignment of organisational intents with current and emerging trends in the environment. This alignment is intended to keep SALGA relevant and concurrently lends itself to the pursuits of developmental local government.

4. PURPOSE OF THIS REQUEST

The purpose of this document is to call for proposals from suitable service providers to assist SALGA to conduct a local government situational analysis that will inform its 2027-2032 strategy. The assignment should assess the changes in policy directions, sectoral reforms and macro socio-political and economic variables that SALGA will need to respond to in fulfilling its mandate over the forthcoming Five-year period. Further to this, the assignment should review SALGA's internal processes, policies, technology and resources that will be needed to respond to the external environment.

The situational analysis must provide a comprehensive understanding of the internal and external factors that impact SALGA's ability to fulfil their mandate to communities and outline the opportunities that exist to transform local governments into robust, transparent, and citizen-focused institutions, ensuring equitable and sustainable service delivery for all South African residents.

5. OBJECTIVES OF THIS REQUEST

The objectives of the assignment are outlined as follows:

- 5.1. To conduct an environmental scan of both the internal and external environment within which SALGA operates. This objective involves undertaking a systematic assessment of the factors, trends, and dynamics that influence SALGA's work and the broader local government sector. The internal scan will review organisational capacity, structures, resources, and operational processes, while the external scan will consider policy changes, sectoral reforms (such as the review of the White Paper on Local Government and funding model), socio-economic trends, stakeholder expectations, and emerging challenges or opportunities
- 5.2. To collect, conduct, and analyse data on the following external environmental factors affecting the role of SALGA: Political, Policy, Economic, Social, Technological, Environmental, Legal. This objective involves identifying and appropriate framework that will be applied to assess the external environment of SALGA. The assignment will analyse political-economy factors and implementation risks, including the implications

of funding model reform, the White Paper on Local Government review, coalition dynamics, and institutional capability.

- 5.3. To apply an appropriate analytical framework that will support realistic, implementation-focused planning, especially where risk management, capacity constraints, and service delivery realities matter. This objective involves identifying a sound methodology to evaluate the internal environment, assess risks to strategic delivery and embed practical risk mitigation measures into all strategic options.

6. SCOPE OF WORK

The scope of work is structured to ensure analytical rigour, actionable insights, and alignment with sectoral reforms as detailed below:

- 6.1. Define the boundaries of the areas to be included in the situational analysis by applying an appropriate framework based on sound methodological justifications.
- 6.2. Conduct in-depth research that applies a relevant framework to describe the current state and condition of SALGA's internal operating environment and external factors informing the local government environment more broadly.
- 6.3. Identify the trends in conditions, the pressures being exerted on local government and the SALGA macro- and microenvironment, the underlying forces driving the pressures, and the responses to the pressures at national and local levels.
- 6.4. Identify the major significant issues or risks that require attention and determine the resources needed to address these issues.
- 6.5. Compile and produce a consolidated report and a presentation profiling the SALGA external and internal environment.
- 6.6. Prepare monthly progress reports and presentations for the project steering committee to review progress and guide the implementation of the project.

The service provider will be responsible for project planning, stakeholder engagement, and reporting, ensuring all activities are completed within the designated three-month period and are aligned with SALGA's governance requirements.

7.2 Bi-Weekly/Monthly Progress Reports: The assignment will be managed through a SALGA project steering committee which will be convened periodically. The service is required to submit bi-weekly or monthly reports to the project steering committee to facilitate effective monitoring of project progress. These reports will enable informed discussion and support tactical decisions necessary to maintain or restore the project's trajectory, address risks and issues raised by the project team, and recommend or approve changes related to the scope, budget, or schedule.

7.3 A concise report: synthesising system-level constraints, critical bottlenecks, and prioritisation choices, with explicit 'do/defer/stop' recommendations for SALGA. The report must be delivered within the initial phase and serve as the foundation for subsequent strategic planning activities.

7.4 Situational Analysis report: A dedicated report or integrated section that examines key political-economy drivers and implementation risks (e.g., funding reforms, legislative changes, coalition governance, institutional capacity). The analysis must provide risk maps, mitigation measures, and recommendations for integrating risk management into the strategic plan. The situational analysis should also focus on the internal SALGA environment where the existing legislation, policies and strategies will be reviewed to address the dynamic environment within which local government operates.

7.5 Summary PowerPoint Presentations – A concise presentation covering the Detailed Situational Analysis for use in briefing governance structures and stakeholders.

7.6 Signed-off Project Closeout Report - A comprehensive report summarising all activities, deliverables, outcomes, challenges, and lessons learned, with formal sign-off from SALGA to confirm satisfactory project completion.
