

## MEMORANDUM

**FROM** : Iziko Museums of South Africa

**REGARDING** : RFQ Addendum IZIKO R&E RFQ 2024/08/08

**DATE** : 19 August 2024

---

### IMPORTANT:

In request to RFQ Number IZIKO R&E RFQ 2024/08/08, Request for Quotation (RFQ) for concrete screeding at Iziko Museum.

We would like to provide some essential clarifications and instructions for concrete screeding after the site visit that was held on Friday, 16<sup>th</sup> August 2024 at Iziko South African Museum. The concrete screeding thickness should be 8mm for both Sea & Us and Rock Art spaces.

Please take note of the following details below of 3 options with regards to filling and sealing the hole in the Rock Art spaces (apart from the overall concrete screeding):

1. Fill void with building rubble and then screed.
2. Leave a large void, place i-beams and a concrete slab (or other material that can withstand some water i.e. marine ply), and then screed. Please ensure that if wood or other material is used, that it will be safe for excessive weight (visitors) and foot traffic over time.
3. Leave a large void, create a base structure that rests 50 cm below the floor (this does not have to be able to hold excessive weight but should be stable and be able to hold some things like fake plants, a bit of soil, museum objects etc), cement the sides of the 50cm section to neaten. This will create a basin/flooring effect (see image 1 below). The surface must then have a tempered glass floor. To reduce costs, the glass flooring can be sectioned as seen in images below. The larger the sections, the better i.e. 1m<sup>2</sup> per square. The best option for stability and safety is preferred. The glass must be able to hold excessive weight.

Image 2

Could you please send us three quotations with including these options respectively:

- Quote A - Concrete screeding plus option 1
- Quote B - Concrete screeding plus option 2
- Quote C - Concrete screeding plus option 3

Work for Sea & Us needs to be completed by 21<sup>st</sup> September 2024.

Work for Rock Art Exhibition needs to be completed by 22<sup>nd</sup> November 2024.

---

Tender Closing Date.

The date of closing is, 22 August 2024, Thursday 2024 at 11:00 am
