RECOMMENDED TENDER DOCUMENT BINDING

1.1. Importance of Tender Document Binding:

- First impression of your business to the recipient/evaluators.
- Documents are easily processed, cared for, accessible, stored, not easily tear and be misplaced.
- To be able to find context without difficulty.

1.2. Recommended Tender Document binding:

- Do not submit your tender in separate loose pages and put them together with a rubber band, even if they are put in an envelope, to avoid being misplaced.
- Bind/file big tender documents separately according to their evaluation criteria rather than forcing all pages into one file for easy processing.
- Put your tender in a sealed envelope. If not practical because of volumes, pack files in a box, seal and label them accordingly.

1.3. Types of Tender Binding allowed:

- **Tape binding**

Tape binding is the most recommendable binder for your tenders to ensure safety, avoid tempering, pages not missing and easy accessibility for different evaluators. However, the files must be separated according to their evaluation criteria to avoid thick files for easy processing. The recommended thickness of each file is about 3cm.

- **Spiral (Comb) Binding**

1. INTRODUCTION AND BACKGROUND

1.1. INTRODUCTION

The Inkomati-Usuthu Catchment Management Agency (IUCMA) is a water resource management institution established under Section 78 of the National Water Act (Act 36 of 1998, NWA) having jurisdiction over the Inkomati-Usuthu Water Management Area (WMA). The Resource Quality Monitoring division is responsible for water quality monitoring within the WMA. As part of this function, a laboratory services contract must be entered into for analysis of water quality samples. Water quality samples will be collected monthly from pre-identified monitoring points within the WMA and in addition investigative water quality samples will be collected as part of gathering evidence when required as well as in cases where water pollution complaints are lodged with the IUCMA.

1.2. BACKGROUND

Chapter 14 of the National Water Act, (Act 36 of 1998; NWA) requires the Minister to establish national monitoring systems in terms of section 137 for the collection of appropriate data and information. The system that is adequate and responsive to the present and future challenges of efficient management of the country's water resources.

The national monitoring system provides data and information necessary to assess the quantity of water in the various water resources, **quality of the water resources**, use of water, rehabilitation of the water resources, compliance to **Resource Quality Objectives (RQOs)** and the health of aquatic ecosystems.

The IUCMA conducts regional water quality monitoring in the Inkomati-Usuthu WMA which feeds into the national monitoring system. The Resource Quality Monitoring (RQM) division conducts the regional water resource quality data and information necessary to address the strategic and operational requirements for purposes of assessment, reporting and protection of the water resource within the Inkomati-Usuthu WMA.

It must be mentioned that for the system to function optimally, water quality data must be collected, analysed, and captured into the system to enable effective decision making. To achieve this, a laboratory services contract must be entered into for analysis of water quality samples (microbiological) to ensure the implementation of surface water quality monitoring programme(s).

2. AIMS AND OBJECTIVES
