15. SPECIFICATIONS

SECTION 1: EXECUTIVE SUMMARY

In accordance with the housing need, Stellenbosch Municipality has identified a portion of land, Erf 7001 at Cloetesville for residential development. Ownership of the property currently vests with Stellenbosch Municipality. "Erf 7001, referred to as "Soek-mekaar" ... is characterised by numerous trees and is located immediately adjacent to a man-made water retention structure. The Municipality has a database (waiting list) in excess of 18 200 persons requiring housing and any development proposal needs to be aligned to the identified need. The particular goal of this Technical Proposals is the delivery of medium to upper (GAP) housing units. There is accordingly an urgent need for the Property to be developed so as to create an integrated urban development (Cloetesville), providing for housing choice together with appropriate economic and social amenities.

- Rental and GAP housing;
- Redevelopment, infill and new development;
- Redevelopment to encourage densities (from 100 to 200 dwelling units/ ha gross) along main transport routes and around public open spaces; and

Stellenbosch Municipality has also developed a Human Settlement Plan that aligns with the SDF and aims to, over a period of 10 years, “utilise municipal land in order to provide interconnected integrated settlements that would target the municipal housing backlog”. The Site is sloped and constrains numerous pine trees. The site contains a water retention/ water tower facility and buffers associated with this facility will need to be investigated. Water supply lines will also need to be determined.

SECTION 3: MINIMUM BID REQUIREMENTS

The project is aimed at facilitating a sustainable integrated development that will, firstly, address the shelter and social and economic sustainability of the inhabitants of Cloetesville and beneficiaries as defined by the Stellenbosch Municipality. This will be achieved with due consideration for the particular environment within which the project is located as well as the optimum development potential of the subject property.

3.1 Housing Pipeline

As stated in 2.3 above the Stellenbosch Municipality Housing Pipeline Annual Review 2017 - 2020, amongst others, lists "Erf 7001 and other possible sites for mix-use development in Cloetesville" for implementation during the 2018/19 Financial Year.

Proposals should maximise the development potential and locational advantages of the properties as well as speak to the specific context and characteristics of the land parcels. Bidders are expected to familiarize themselves with these requirements and context and align their project proposals therewith. While all Bidders are encouraged to be creative and flexible in their approach, the following minimum targets must be met.

3.2 The Target Market and Beneficiaries

3.2.1 Target Area

Table 2: Typical target market

	Target Market
Estimated house price	R500 000 – R1 200 000

3.2.2 Type of housing envisaged

Notwithstanding the above, the Municipality has a database (waiting list) in excess of 18 200 persons requiring housing, in the form of either: -

- affordable (GAP) housing units for those with monthly incomes exceeding R7001 but not exceeding R22 000.

3.3 SCOPE AND OBJECTIVES

The main objective is to undertake a Broad Conceptual Urban Design framework for Erf 7001, Cloeteville, Stellenbosch, and to obtain town planning and development rights. It is required of the successful bidder to obtain planning and development rights in terms of applicable legislative Policies and by-laws of the Stellenbosch Municipality.

The successful bidder must take the following guidelines into consideration in order to successfully complete the scope of works.

3.3.1 Development Framework

- Continuously participate with the professional team (PSP's), including all relevant stakeholders in formalising urban design proposals for the proposed development. This includes, but not limited to a) residential, b) non-residential, c) public and private spaces and d) environmental and social considerations.

PRINT NAME:			
CAPACITY:		Name of firm

- b) Advise the Department on stage related impacts, risks and viability of the project.
- c) The Urban Designer must provide the Architect with the number and scope of typologies and assist the Architect in formulating architectural designs for a set number of residential typologies and densities to cover the preferred options in different household income categories.
- d) In collaboration with the Architect and Town Planners identify recent development initiatives in the field of human settlements that have relevance and evaluate these in order to draw lessons and examples of good practice that can where relevant be considered in this project. This also includes the review of alternative approaches, strategy, principles and prototypes for the subject properties.
- e) Consider and advise on Alternative Building Technologies (ABT) in consultation with the Architect in respect of constructability, maintenance and affordability in order to align to the urban design vision.
- f) Analyse the different development options in respect to a) financial and affordability calculations on an urban scale, b) stakeholder and project team input and c) strategic objectives of the Department.
- g) Prepare draft series of plans depicting the various development options with a recommendation, analysis and motivation on a preferred development option. This must be done in conjunction with the other relevant PSP's, depicting the results of all work done (as evidence) in addition to plans in support of the results.
- h) Prepare final series of plans of development options and preferred alternative in response to Department's objective, community feedback and PSP inputs.
- i) Ensure that the final plan feeds into the development framework which will guide and inform the statutory processes.
- j) Provide possible solutions for the challenges by the land invasion that took place on a portion of the land. The scope and objective for this study needs to also address the challenges and provide solutions in order to accommodate the inhabitants on the property.

3.3.2 Layout

It is suggested that the proposed Site Development Plan allow for:

- Residential erven to front onto open space, ensuring improved surveillance as well as ensuring that green space becomes a positive element in the urban fabric;
- Mixed-use activity;

PRINT NAME:			
CAPACITY:		Name of firm	
SIGNATURE:		DATE:	

- Variation of erf sizes, allowing flexibility to the housing typologies that can be accommodated on the sites, thereby catering for a range of different income groups; and
- medium to upper (GAP) housing units, preferably with erf sizes between 150m² to 200 m².

What remains important is the overall objective of a mixed-income development, creating housing opportunities for the income categories identified below and a range of choice to prospective owners.

3.3.3 Access

The successful Bidder will be required to conduct a Traffic Impact Assessment (TIA) and implement its recommendations subject to approval by Stellenbosch Municipality.

In addition to the design principles listed below, proposed access arrangements must be sensitive to not creating a stand-alone development isolated from the existing urban development in the area.

3.3.4 Landscaping

- Appropriate landscaping techniques and materials must be applied to create a livable, human-friendly environment that will not distract from the natural feel of the surrounds; and
- Care must be taken to ensure that both hard and soft landscaping provide for an environment that is both visually pleasing as well as low on maintenance. The use of alternative materials must be considered.

3.3.5 Design Principles

A safe community:

- Design principles should be focused on the creation of a safe environment by giving appropriate attention to, amongst others, passive surveillance, legibility and the interface between the public and private realms.

Permeability and Street Linkages:

- Permeability of the site at local neighborhood level should be achieved through street linkages with neighborhoods surrounding the site;
- The internal movement system should be planned to achieve maximum permeability and ensure that pedestrian movement through the site is efficient.

PRINT NAME:			
CAPACITY:		Name of firm	
SIGNATURE:		DATE:	

The internal road layout of the site should reflect a clear urban structure that is legible, in which one should be able to orientate oneself; and

- Street names (Policy).
Integration:
- Non-residential land uses should be externalized as far as possible to ensure a healthy level of integration with the surrounding context by means of resource sharing.

3.3.6 Continuity

The development of the sites presents an ideal opportunity to integrate existing developed areas in order to reinforce continuity of the urban fabric. There are clear benefits relating to the infill of under-utilised land for this purpose. These include:

- Significant residential infill in a context where existing municipal bulk infrastructure and land is under-utilised. Thereby optimising available resources.
- Promotion of safer urban environments. Generally, the utilisation of vacant and otherwise wasted space contributes to a safer residential environment. This is achieved through the elimination of loitering space for antisocial behaviour as well as the increase in surveillance brought about by additional frontages onto open space by residential infill.
- An increase in the tax rate base for the Local Authority as well as reduced operational costs for maintenance of under-utilised land.

3.3.7 Active street interfaces

- Any proposed layout should maximise positive interfaces within the residential environment. Where possible residential erven should be laid out to front onto open spaces ensuring improved surveillance as well as ensuring that green spaces become a positive element in the urban fabric.

3.3.8 Promotion of choice through variation of erf sizes

- Variation of erf sizes adds flexibility to the housing typologies that can be accommodated on the sites. Thereby catering for a range of different income groups is encouraged.

4 CONCEPTUAL FRAMEWORK

4.1 Overall Concept

- **Integrative Urban Precinct:** Given the location of the sites, development should display a complementary balance of uses.
- **Economic Development:** The development of an environment that is conducive to and encourages economic development is vital for the creation of a quality urban settlement.

4.2 Public Space

- **Integration of Public Spaces with Community Facilities:**

Proposed Public spaces should be integrated with community facilities and services. Linkages of facilities adjacent to public open spaces to allow for resource sharing between activities, thereby promoting 'place-making'.

- **Dignified Space Concept:**

Public spaces within the sites should act as focal points for social interaction that are responsive, attractive and comfortable to the community. Therefore, a key objective should be the creation of dignified public space precincts.

- **Linkages between Public Spaces:**

Public Spaces should as far as possible be linked to one another via landscaped priority routes within the sites, thus creating a pleasant environment and enabling local end-users to easily navigate between public spaces.

- **Safe Human Environments:**

Public spaces should be externalised in order to promote exposure through increased visibility as well as added surveillance achieved through positive erf frontages.

4.3 Access and movement

- All roads and movement channels must be designed in accordance with the standards and norms of the Directorate: Engineering Services of Stellenbosch Municipality.
- All parking requirements must be in accordance with the planning by-laws of the Stellenbosch Municipality.
- Internal road configuration within the site should allow for maximum permeability,

thereby enabling seamless movement throughout the sites.

- Non-motorized transport must be prioritized with the provision of bicycle lanes and routes and appropriately designed sidewalks.
