SECTION 3: BACKGROUND, OVERVIEW AND SCOPE OF REQUIREMENTS

1 BACKGROUND

The Transnet-Phelophepa Health Care Train Project operates in all nine provinces of South Africa, providing comprehensive primary health care services. Over six hundred patients visit each of the trains daily, with many of these patients sleeping outside the train. The project also recruits casual workers from every community visited. Ablution facilities are required for these patients and workers at all the stations visited by both trains.

Patients coming to the Transnet-Phelophepa Health Care Trains require ablution services while they wait to be assisted. The trains also recruit temporary workers at each station who need to use the ablution facilities. These services are required at every station visited by the trains. Resources are often limited in these communities and such ablution services cannot be sourced in most of the places visited by the trains. To maintain a standard level of service it is more practical to source a service provider to cover all stations on a single route.

2 SCOPE OF REQUIREMENTS

Detailed Scope of work

- Ability to operate nationally.
- Capacity to provide the required units for 36 months.
- The flushing system of each toilet must be a two-tank flushing system which continuously recycles water, waste, and chemicals. One tank must be a water holding tank while the second tank must be a waste holding tank.
- The waste-holding tank must be filled with a diluted chemical that is SABS compliant e.g., Aqua Blue or J&J PROPAXX ELITE PACKETS Holding Tank Deodorizer. The chemical must liquefy waste for easier tank emptying, deflate gas build-up and keep waste holding tank fresh smelling.
- The honey sucker truck capacity must be 2400-liter minimum capacity as this truck will be used to suction the toilets on the train and the VVIP mobile flush toilets.
- The flush-water tank must be always filled with Rinse Blue and water. The toilets should be cleaned onsite with an antibacterial chemical and soapy water and emptied onsite using a honey-sucker. At no time should toilets be removed from the site to be emptied of waste.
- The supplier must supply the same SABS approved chemical, e.g., Aqua Blue for the Phelophepa Trains toilets. An estimated of 2000 sachets of chemical will be required per train per annum.
- The service provider must appoint onsite staff to clean and maintain the toilets daily (seven days a week) and follow the trains to all stations in all provinces. The service provider should accommodate the onsite staff at their own cost.
- Daily lunches for the onsite staff of the preferred service provider will be included as part of the contract; however, the service provider onsite staff must adhere to all relevant health protocols

observed on Phelophepa such as not entering with their work gear (overalls, boots etc.) inside the train.

- All the mobile toilet trailers should be fitted with the appropriate steps to the toilets as well as rails next to the steps for the use of elderly or sick patients.
- The service provider should provide their own water and sewerage truck for waste removal and be able to arrange with local municipalities for disposal of human waste prior to our arrival at the relevant station.
- The service provider must comply with waste disposal requirements at each municipality with the understanding that failure to comply reflects negatively on Transnet.
- The service provider must provide toilet paper for all toilets, which must be available day and night.
- The storage of the toilet paper is the responsibility of the service provider. The service provider needs to provide their own chemical to clean the toilets and ensure there is no smell at any time.
- The service provider needs to provide vehicles at their own cost to transport the toilet units from one station to the next station as the Phelophepa trains travel.
- The service provider must work closely with the Transnet appointed Social Mobilisers to identify municipal waste dumping sites and the Phelophepa Managers with regards to where to place the toilets at the different railway stations. Toilets should be distributed fairly along the train and one toilet should be positioned outside the Health Clinic coach of each train for the purpose of urine testing.
- The service provider must set up toilets by Saturday, 15h00 each week.
- The service provider must have the capacity and resources to provide the required ablution facilities as and when required stations.
- The service provider must follow the relevant legislation and municipal by-laws with regards to disposal of human waste.
- All services, including the units must comply with the municipal environmental health requirements.
- The service provider must be able to work in all scheduled communities.
- VVIP Toilets must have wash basins, flush toilets, odour control chemicals, toilet paper, handwash liquid and paper towels for drying hands.
- One of the units provided must be a paraplegic friendly facility with handrail support / must be wheelchair friendly and the toilet must be disability friendly with the toilet flush handle meeting prescribed standards for persons with disabilities.
- The VVIP toilets must be of the same standards and quality at every station / community visited.
- The supplier must have the resources to ensure that the toilet is cleaned hourly due to the high patient volumes that the Phelophepa Health trains cater for and that the septic tanks of the units are suctioned daily

*Respondents must complete and submit **Annexure I(Bidder declaration Letter) and J(Customer reference Letter) Template**. A Respondent's compliance with the minimum functionality/technical threshold will be measured by their responses to **Annexure I and J***

Template. It will be advantageous to bidders to submit as many references as possible with the information as per the template provided (Annexure J).

Respondents are to note that Transnet will round off final technical scores to the nearest 2 (two) decimal places for the purposes of determining whether the technical threshold has been met.

The minimum threshold for technical/functionality must be met or exceeded for a Respondent's Proposal to progress to Step Four for final evaluation.

4.6 STEP FOUR: Evaluation and Final Weighted Scoring

a) **Price Criteria** [Weighted score 80 points]:

$$PS = 80 \left(1 - \frac{Pt - Pmin}{Pmin} \right)$$

Where:

Ps = Score for the Bid under consideration

Pt = Price of Bid under consideration

Pmin = Price of lowest acceptable Bid

- b) **Specific Goals** [Weighted score 20 point]
- Specific goals preference points claim form

- Respondents are to note that Transnet may not award a contract if the price offered is not market-related. In this regard, Transnet reserves the right to engage in PTN with the view to achieving a market-related price or to cancel the tender. Negotiations will be done in a sequential manner i.e.:
 - first negotiate with the highest ranked bidder or cancel the bid, should such negotiations fail,
 - negotiate with the 2nd and 3rd ranked bidders (if required) in a sequential manner.
- In the event of any Respondent being notified of such short-listed/preferred bidder status, his/her bid, as well as any subsequent negotiated best and final offers (BAFO), will automatically be deemed to remain valid during the negotiation period and until the ultimate award of business.
- Should Transnet conduct post tender negotiations, Respondents will be requested to provide their best and final offers to Transnet based on such negotiations. Where a market related price has been achieved through negotiation, the contract will be awarded to the successful Respondent(s).

- The financial stability of the bidder based on key ratio analysis, which would include, but not be limited to Efficiency, Profitability, Financial Risk, Liquidity, Acid Test, and Solvency;
