ADDENDUM FOR THE QUESTIONS RAISED BY SUPPLIER

Abnormal Load Escorting and Security Specification “as and when” Required Basis for a period of 60 months

E0226LSERIR

1. Question

I just need clarification as per tender briefing held earlier regarding above tender number. As per technical specifications, the process is rather unfair to small companies as I've stated that no small company keeps 10x escort bakkies. The scope is mainly catered for big abnormal companies which has over 10x abnormal trucks that will keep a fleet of 10x bakkies. In that regard it automatically eliminates small companies when it spoke about supplier development. May the technical team relook that particular part because that is considered gate keeping. The part where it requires ownership of minimum of 8 bakkies on the tenderer name. It would be fair if companies were allowed to provide letter of intent if ownership is not on their company names but if not it means this tender is mainly for big companies. Your urgent response will be highly appreciated.

Answer

3.5.3 Limitations on subcontracting on the NEC page 35 of 37

The Employer may require that the Contractor must subcontract certain specialised work, or that the Contractor shall not subcontract more than a specified proportion of the whole of the contract.

Kind Regards,
