**TERMS OF REFERENCE FOR THE APPOINTMENT OF A SERVICE PROVIDER TO
DEVELOP A PRECINCT PLAN WITHIN A PERIOD OF SEVEN (7) MONTHS IN
GAUTENG PROVINCE: SOKHULUMI PRECINCT PLAN IN THE CITY OF TSHWANE
METROPOLITAN MUNICIPALITY**

1. INTRODUCTION

- 1.1. The Department of Agriculture, Land Reform and Rural Development (DALRRD) under the Branch Spatial Planning and Land Use Management (SPLUM) needs to appoint a service provider(s) or a consortium of suitably qualified service providers to develop the Sokhulum Precinct Plan which is located within the City of Tshwane Metropolitan Municipality (CoT) in Gauteng Province.
- 1.2. The DALRRD seeks to appoint a suitably qualified and experienced service provider(s), primarily Town/Urban/City and Regional Planners complimented by a team of other experts (outlined in section 9) for a period of seven (7) months to render professional services in preparing the Sokhulum Precinct Plan for the City of Tshwane Metropolitan Municipality.

2. BACKGROUND

- 2.1 Precincts are not necessarily formal administrative areas in terms of current planning legislation or policies. Precinct commonly refers in planning to a geographically smaller area with specific characteristics that requires detailed planning and interventions within the broader administrative boundaries of a municipality and the exact size of a precinct will thus vary.

TERMS OF REFERENCE FOR THE APPOINTMENT OF A SERVICE PROVIDER TO DEVELOP A PRECINCT PLAN WITHIN A PERIOD OF SEVEN (7) MONTHS IN GAUTENG PROVINCE: SOKHULUMI PRECINCT PLAN IN THE CITY OF TSHWANE METROPOLITAN MUNICIPALITY

2.2 A precinct can be developed to provide a new desired development pattern to an area, alter existing land use disparities, protect and promote existing predominant or preferred future dominant land uses and associated ancillary or compatible land uses. Example of core attributes a precinct plan should protect and promote includes:

- A sense of place;
- Functional built environment to promote:
 - Accessibility-paths and linkages;
 - Equity-even distribution of resources;
 - Integration- place making;
 - Functionality-compatibility of land use activities;
 - Sustainability-social, economic, institutional enhancement and environmental protection.
- Economic activities and opportunities;
- Agriculture;
- Intensive animal production;
- Sport and recreation;
- Forestry;
- Water supply catchments and other water supply sources;
- Rural or eco-tourism;
- Mining and extractive resources;

2.3 A precinct plan is a planning tool that sets out a vision for the future development trajectory of an area. It establishes a planning and management framework to guide development and land-use change and aims to achieve environmental, social and economic objectives.

TERMS OF REFERENCE FOR THE APPOINTMENT OF A SERVICE PROVIDER TO DEVELOP A PRECINCT PLAN WITHIN A PERIOD OF SEVEN (7) MONTHS IN GAUTENG PROVINCE: SOKHULUMI PRECINCT PLAN IN THE CITY OF TSHWANE METROPOLITAN MUNICIPALITY

- 2.4 A precinct plan as required by this project should take into account all of the issues affecting an area, including its buildings and spaces, land uses, activities and transport. An essential aspect of the precinct planning process is feedback from the community on how the area should evolve. An important phase of the precinct planning process requires consultation with the community, residents, businesses and the development industry to determine the best outcome for the precinct area.
- 2.5 Each precinct plan requires detailed and ongoing consultation with its local community. From the background research, analysis and consultation, the precinct plan should determine what is working well in an area and how this can be enhanced, and how the area can grow and change in the future. It provides clear strategies and detailed actions for how this can be achieved through the implementation of the precinct plan over time.
- 2.6 The precinct plan will inform interventions by both the public and private sectors in order to facilitate economic growth and development through social, spatial and economic development or regeneration. The aim is to initiate, stabilize, consolidate and promote economic development in the precinct and to enhance business efficiencies and opportunities as a response to various government initiatives by proposing appropriate land-use interventions or densities within this nodal area.
- 2.7 The proposals in the precinct plan should inform the overall development of the precinct in terms of medium to long-term strategic interventions required to promote the development of spatially and economically integrated precincts that are attractive, efficient, convenient, safe and effectively managed. The interventions will also promote restructuring, sustainable communities, economic development, poverty alleviation and environmental sustainability.

- 2.8 The primary aim of a precinct plan is the arrangement of land use and infrastructure associated with the needs of specific communities within administrative regions. It integrates transportation, environment, education, economic development, social, residential development and other developmental requirements. Development needs, opportunities and priorities are identified. It is a process that is community-based and driven.
- 2.9 The required precinct plan must: -
- 2.9.1 Give effect to the development principles contained in the Spatial Planning and Land Use Management Act, 2013
- i. Spatial Justice;
 - ii. Spatial Sustainability;
 - iii. Efficiency;
 - iv. Spatial Resilience; and
 - v. Good Administration
- 2.9.2 Be consistent with the City of Tshwane Metropolitan Spatial Development Framework, 2021 as well as the Region 7 Regional Spatial Development Framework, 2018.
- 2.9.3 Set out objectives that reflect the desired spatial form of the rural community of Sokhulumu within the City of Tshwane Metropolitan Municipality;
- 2.9.4 Contain strategies, policies and plans which must-
- i. Indicate desired patterns of land use within the precinct;Address the spatial reconstruction of the location and nature of development within the identified precinct; and
 - ii. Provide strategic guidance in respect of the nature of development within the precinct.

TERMS OF REFERENCE FOR THE APPOINTMENT OF A SERVICE PROVIDER TO DEVELOP A PRECINCT PLAN WITHIN A PERIOD OF SEVEN (7) MONTHS IN GAUTENG PROVINCE: SOKHULUMI PRECINCT PLAN IN THE CITY OF TSHWANE METROPOLITAN MUNICIPALITY

- 2.9.5 Set out basic guidelines for a land use management system in the precinct;
- 2.9.6 Identify programmes, projects and restructuring elements for the development of land within the precinct;
- 2.9.7 Provide a visual representation of the desired spatial form of the precinct which:
- i. must indicate where public and private land development and infrastructure investment should take place;
 - ii. must indicate desired or undesired utilization of space in the particular area;
 - iii. may delineate the land use parcels and precincts;
 - iv. must identify areas where strategic intervention is required;and
 - v. must provide urban design interventions and guidelines to enhance the aesthetic appeal.
- 2.10 Rural communities are still characterized by poverty, inequality, limited access to basic social infrastructure, underdevelopment, lack of economic opportunities, fragmented spatial patterns and environmental degradation. Previously rural communities relied more on agriculture and subsistence farming for food and income/exchange benefits. The rural parts of the country are still associated with high levels of poverty, poor spatial planning, lack of economic opportunities and poor access to basic services.
- 2.11 The Development of Rural Development Sector Plans that will assist in identifying opportunities of these rural spaces of South Africa to ensure that they achieve their development potential. The precinct plan developed within rural spaces will seek alignment to the Rural Development Plan of the Province and that of the City of Tshwane.

3 PROBLEM STATEMENT

The introduction of the Spatial Planning and Land Use Management Act (SPLUMA), 2013 has realized the process of wall-to-wall planning. In terms of Chapters 4 and 5 of SPLUMA, the preparation of planning tools, frameworks and legislation needs to:

- *“Include previously disadvantaged areas, **areas under traditional leadership**, rural areas, informal settlements, slums and land holdings of state-owned enterprises and government agencies and address their inclusion and integration into the spatial, economic, social and environmental objectives of the relevant sphere”.*
- *“Include provisions that permit the incremental introduction of land use management and regulation in areas under traditional leadership, rural areas, informal settlement, slums and areas not previously subject to a land use scheme”.*

In light of this the Department, through the Directorate SPLUM, is prioritizing SPLUMA implementation in areas under traditional leadership through the Local Area Planning (precinct plans) initiatives.

- 3.1 In response to the Gauteng Rural Development Plan, 2014 the concept of an Agri-village needs to be explored for the rural community of Sokhulum. This concept seeks to integrate residential development with agriculture in order to improve the livelihood of rural communities, the expansion of this area should place more emphasis on agriculture. The village of Sokhulum presents a unique opportunity for the establishment of an Agri-village in the region.
- 3.2 There is however a significant challenge with regards to the severe water constraints in the entire region. The region’s water is supplied by Rand Water who abstract their bulk water supplies from the Vaal Dam. The abstraction already

exceeds the licensed water use quota of 1600mil m³/annum and at the moment there are no indications that this water quota might be considered to be increased until 2029 when the Lesotho Highlands Phase 2 is expected to be commissioned.

- 3.3 This poses a threat to the growth and development of the area, in addition, there are increasing water demands that the infrastructure is inadequate to meet. There are planned infrastructure augmentation projects in the form of reservoirs and system booster pump stations which will assist in restoring the water crisis in the region and as such in Sokhulumi.
- 3.4 The Sokhulumi area does not currently have a plan guiding spatial planning and land use management in the area and only depends on the Agri-village concept to guide any development and land use activities.

4 LOCATIONAL CONTEXT

Map 1: Sokhulum Village

- 4.1 Sokhulum is located in the far north eastern part of the City of Tshwane as outlined in the Region 7 RSDF, 2018. Region 7 is the eastern most area of the City of Tshwane bound by Mpumalanga to the north and east and City of Ekurhuleni to the south. This is a rural region which is under traditional leadership and poses a great agricultural and tourism potential.

- 4.2 The area is under served in terms of engineering and social infrastructure as such a precinct plan can ensure the identification and prioritization of such infrastructure for the growth and development of the area.
- 4.3 The region is characterized by vast high potential agricultural land and has good regional connectivity which places it in a good strategic position to become a major supplier of agricultural produce both for beneficiation within the Sokhulumu area and for the region. Both small-scale and large-scale agriculture in the form of crop and livestock farming can be undertaken in the area in line with the provincial strategies and plans that identify the area for intensive agricultural development and beneficiation.

5 THE LEGISLATIVE FRAMEWORK

5.1 The Traditional and Khoi-San Leadership Act, 2019

The traditional leadership of the Sokhulumi Traditional authority is recognized in terms of the Act and all processes and procedures should be followed in alignment with the Act. All functions and duties pertaining to the traditional leadership will be subject to Section 15 of the Act.

5.2 The Spatial Planning and Land Use Management Act

5.2.1 The Spatial Planning and Land Use Management Act no. 16 of 2013 (SPLUMA) is a legislation that gives a framework for all spatial planning and land use management in South Africa. It seeks to promote consistency and uniformity in procedures and decision-making pertaining to issues spatial planning and land use management. Other objectives include; addressing historical spatial imbalances and the integration of the principles of sustainable development into land use and planning regulatory tools and legislative instruments.

5.2.2 In terms of Chapter 3, Section 9 the National Government must provide support and assistance to municipalities in the performance of its land use management functions and also monitor the quality and effectiveness of municipal spatial development frameworks and **other spatial planning and land use management tools and instruments** of municipalities.

5.3 The City of Tshwane Metropolitan Spatial Development Framework, 2021

The purpose of the above-mentioned framework is to provide a spatial representation of the City vision and to be a tool to integrate all aspects of spatial planning. The MSDF aims to address the following towards the achievement of the City vision:-

- Restructuring of a spatially inefficient City
- Promotion of sustainable use of land resources
- Strategic direction around infrastructure provision
- creating opportunities for both rural and urban areas

The character of suburban neighborhoods throughout the metropolitan area may vary in terms of levels of homogeneity (i.e. permitted levels of infiltration of non-

residential uses), level of control, densities, built form, environmental quality, et. In order to respond to different locations, topographical, cultural, socio-economic and other circumstances. Nevertheless, they remain primarily residential areas and should always be developed as convenient, pleasant, comfortable and safe living environments.

5.4 Regional Spatial Development Framework, 2018

The RSDF of Region 7 identifies nodes in the metropolitan area that are characterized by largely mono-functional land uses taking up large, concentrated and defined space. The character of the areas ranges from industrial to high technology smart industries, medical facilities, educational, conservation and areas earmarked for agricultural purposes.

It is important to acknowledge these specialized activity areas not just in terms of their scale, but because of their sphere of influence in terms of generating movement, opportunities and linkages with other areas. These linkages do not only refer to physical linkages, but also to “connectivity” in a broader sense, such as between institutions of learning and research.

The site is situated in an area earmarked for agricultural purposes in terms of the applicable RSDF. The RSDF is currently being reviewed and the review process should be aligned to the development of the precinct plan.

5.5 The City of Tshwane Rural Development Strategy, 2021

The Rural Development Strategy outlines the Sokhulumu area as a rural intervention area. The communal farmers within the area need to be capacitated to ensure connectivity to the Agripark.

and programme implementation.

6.1.2 The precinct plan should detail the type, location, size and configuration of the proposed precinct. Depending on these factors, some of the matters discussed in paragraph 2 of this Terms of Reference may have more or less relevance to the proposed rural precinct. The precinct plan should indicate the relevance of each matter and detail how relevant matters have been addressed.

6.1.3 Enhancing infrastructure and investment opportunities for activities. The precinct plan should identify opportunities to coordinate and integrate rural and urban planning, especially planning for local and regional infrastructure. This information can be used to assist in prioritizing infrastructure options such as transport networks and water supply systems. The precinct plan should improve the exchange of benefits of regional and local infrastructure between urban areas and rural precincts.

6.1.4 Enabling rural industries to diversify, adjust, innovate and value-add. The precinct plan should include strategies and actions that support the diversification of compatible activities, encourage innovative land-use planning and management, assist in implementing adjustment strategies, or add value to activities within a precinct.

6.1.5 Identifying alternative economic uses of land. The precinct plan should aid in identifying alternative economic uses of rural land by establishing a vision and identifying economic, social and environmental opportunities and constraints to improve the profitability and sustainability of natural resource use in the precinct.

6.1.6 Protecting and promoting productive activities within a precinct and associated regional landscape values within a precinct. The precinct plan should

aid in identifying strategies and actions that protect and promote productive activities, including the range of landscape values supported by the particular rural precinct. In addition, a precinct plan should help identify opportunities and constraints to promote the ecologically sustainable development of the natural resources within the precinct.

6.1.7 Sustaining benefits to the community derived from the natural environment. The precinct plan should protect the environmental and natural resource values of the rural area by protecting or promoting activities that employ best practice management, maintain or enhance ecosystem services, and/or implement regional natural resource management plans.

This section should identify how the proposed planning scheme alignments achieve the planning intent for the rural precinct(s) by describing how the proposed assessment tables, planning and subdivision controls, and any land-use restrictions satisfy the matters listed above.

6.1.9 Management and Implementation strategies. This section should identify how other planning and management initiatives contribute to achieving the planning intent of the rural precinct(s) and the matters listed above.

6.1.10 Customary practices. All customary processes that are applicable to the traditional authority should be included as part of the land use and spatial planning processes where applicable.

6.1.11 Utilisation of technology. Technology such as drones (aerial photography) and web applications should be utilised in conjunction with other information gathering processes to inform the development of the precinct plan.

TERMS OF REFERENCE FOR THE APPOINTMENT OF A SERVICE PROVIDER TO DEVELOP A PRECINCT PLAN WITHIN A PERIOD OF SEVEN (7) MONTHS IN GAUTENG PROVINCE: SOKHULUMI PRECINCT PLAN IN THE CITY OF TSHWANE METROPOLITAN MUNICIPALITY

6.1.12 Formal recording of rights. The development of the precinct plan should include the processes to guide the traditional authority on the formal recordal of land use rights that can be included in the municipal land use management processes. There should be an audit of the current land uses in the settlement and a process of aligning the uses to the land use scheme.

6.1.13 Land degradation and land invasion. There should be processes outlined to ensure that the allocation of land and the permissible land use activities in the settlement do not contravene the municipal land use management and spatial planning systems.

7. SCOPE OF WORK

7.1 The successful service provider would be expected to undertake the following towards the development of the Precinct Plan:
