A specific brand (CASTROL) has been requested for the oil on this RFQ, based on the following:
Different brands of oils cannot be mixed, due to their different characteristics and composition. If they are mixed, chemical reactions based on the different additives would occur – resulting in the degradation of the lubricant, eventually causing pre-mature equipment failure. 'Top-ups' cannot take place with different brands, which means that the pumps must be fully drained on each occasion a 'top-up' is required, which is wasteful and uneconomical - currently all pumps on site are safely and reliably operated with Castrol oil.
