BACKGROUND

The Budget Checker Tool is an internal financial control mechanism used to verify the availability of budget before the procurement of goods or services is initiated. The tool consolidates budget allocations, actual expenditure, and projected commitments for a specific cost centre and financial year.

Before raising or approving invoices or procurement requests, users capture the invoice amount in the tool, which automatically calculates the remaining available budget. This ensures that expenditure does not exceed the allocated budget and that all financial commitments are aligned with the approved financial plan.

The tool also provides a monthly breakdown of the budget versus actual expenditure, enabling users and management to monitor spending trends and identify potential overspending early in the financial cycle.
