TECHNICAL SPECIFICATION

1. PREAMBLE

Johannesburg Water (JW) requires the supply and delivery of compact, robust, battery-powered Remote Data Loggers (RDLs) capable of remote monitoring, configuration, programming and data retrieval. The Remote Data Loggers shall be suitable for monitoring and recording flow, pressure, level and other process measurements, either individually or in combination, at selected field installations. Bidders may offer equipment sourced from one or more manufacturers, provided that the proposed equipment fully complies with the requirements of this specification and that adequate technical support, servicing and warranty support are available within South Africa.

Tender Submission Requirements

The bidder shall clearly indicate the following information for each item offered:

- Manufacturer (Make)
- Model Number / Part Number
- Unit Price

Relevant technical datasheets / product specifications and or operating manuals shall be submitted with the tender response to enable technical evaluation of the equipment offered. Failure to provide the above information shall result in the submission being deemed non-compliant.

2. REMOTE DATA LOGGER FUNCTIONAL REQUIREMENTS

The Remote Data Logger shall, as a minimum, provide the following input capabilities:

Analogue Inputs

- Minimum of two (2) analogue inputs.
- Inputs shall be compatible with industry-standard 4-20 mA instrumentation signals.
- Each analogue input shall be galvanically isolated.
- Individual 24 VDC sensor loop power shall be available for each analogue channel.
- The device shall include power-saving functionality, including sleep-mode operation where applicable.

Digital Input

- Minimum of one (1) digital pulse input.
- Compatible with electronic and mechanical pulse outputs.
- Shall include pulse filtering or debounce functionality to prevent false counting caused by contact bounce.

General Functionality

The Remote Data Logger shall be microprocessor-based and fully configurable by authorised users.

The device shall support:

- Remote configuration and diagnostics.
- Local configuration through a wireless interface such as Bluetooth or equivalent.
- Cellular communications using a minimum of 4G (LTE) technology.

3. POWER SUPPLY REQUIREMENTS

The Remote Data Logger shall be supplied complete with all batteries required for normal operation.

Battery Operation

- The standard configuration shall be battery-powered.
- Batteries shall be housed within the enclosure and be replaceable by JW personnel without voiding the product warranty.
- Under normal operating conditions, the battery life shall be a minimum of two (2) years, based on:
 - 5-minute logging intervals on all active channels; and
 - Two (2) data transmissions per day.

Replacement Batteries

Replacement batteries shall be readily available within South Africa and shall not require procurement through a single proprietary supply source.

External Power Supply

The Remote Data Logger shall support operation from external DC power supplies, including:

- 12 VDC systems; and or
- Solar photovoltaic power systems.

The device shall automatically revert to internal battery power in the event of external power failure or insufficient supply voltage.

4. COMMUNICATIONS AND PROTOCOLS

The Remote Data Logger shall support open and industry-recognised communication protocols suitable for integration with existing and future monitoring systems.

At a minimum, the following shall be supported:

- MQTT and or UDP/IP communications.
- Integration with SCADA, telemetry, historian, database and monitoring systems.
- Automatic time synchronisation from a network or equivalent source.
- 4G (LTE) cellular communications as a minimum standard.
- Operation on any ICASA-approved mobile network available within South Africa.

Configuration changes and firmware updates shall be possible through one or more of the following methods:

- Remote communications platform;
- Secure web interface;
- Cellular communications link;
- Bluetooth connection; or
- SMS configuration functionality.

5. LOGGING INTERVALS

The logging interval shall be user-configurable. The selectable logging interval shall range from one (1) minute to twenty-four (24) hours, including intermediate intervals.

6. DATA TRANSMISSION AND STORAGE

Data Transmission

- Transmission intervals shall be user-configurable from one (1) minute to twenty-four (24) hours.
- Where external power is available, near real-time streaming of measurement data shall be supported.
- All logged records shall contain a date and time stamp.

Data Storage

The Remote Data Logger shall provide sufficient internal storage capacity to retain a minimum of twelve (12) months of logged data when all available input channels are logged at 15-minute intervals. This requirement shall apply when the device is operating as a standalone data logger and regardless of the availability or status of cellular communications.

The storage capacity shall be sufficient to ensure uninterrupted data collection during extended communication outages and when cellular communication functionality is disabled or unavailable.

Storage may be provided through:

- Internal non-volatile memory; or
- Removable memory media.

The storage system shall ensure secure retention of all logged data during communications failures or network interruptions. Authorised users shall be able to directly retrieve and recover all stored historical data from the Remote Data Logger in the field without reliance on remote communications or cloud-based services.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
