SECTION 8**SBD 9 - CERTIFICATE OF INDEPENDENT BID DETERMINATION**

1. Section 4(1)(b)(iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging). Collusive bidding is a per se prohibition meaning that it cannot be justified under any grounds. Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
2. Transnet will take all reasonable steps to prevent abuse of the supply chain management system and to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
3. This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
4. In order to give effect to the above, the following certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

Before completing this declaration, bidders must study the General Conditions, Definitions, Directives applicable in respect of Local Content as prescribed in the Preferential Procurement Regulations, 2017, the South African Bureau of Standards (SABS) approved technical specification number SATS 1286:2011 (Edition 1) and the Guidance on the Calculation of Local Content together with the Local Content Declaration Templates [Annex C (Local Content Declaration: Summary Schedule), D (Imported Content Declaration: Supporting Schedule to Annex C) and E (Local Content Declaration: Supporting Schedule to Annex C)].

1. General Conditions

- 1.1. Preferential Procurement Regulations, 2017 (Regulation 8) makes provision for the promotion of local production and content.
- 1.2. Regulation 8.(2) prescribes that in the case of designated sectors, where in the award of bids local production and content is of critical importance, such bids must be advertised with the specific bidding condition that only locally produced goods, services or works or locally manufactured goods, with a stipulated minimum threshold for local production and content will be considered.
- 1.3. In terms of Regulation 16(2) of the Preferential Procurement Regulations, 2017, any sector designated and minimum threshold determined for local production and content for purposes of regulation 9 of the 2011 Regulations and in force immediately before the repeal of the 2011 Regulations, are regarded as having been done under regulation 8(1) of the 2017 Regulations.
- 1.4. Where necessary, for bids referred to in paragraph 1.2 above, a two stage bidding process may be followed, where the first stage involves a minimum threshold for local production and content and the second stage price and B-BBEE.
- 1.5. A person awarded a contract in relation to a designated sector, may not sub-contract in such a manner that the local production and content of the overall value of the contract is reduced to below the stipulated minimum threshold.
- 1.6. The local content (LC) expressed as a percentage of the bid price must be calculated in accordance with the SABS approved technical specification number SATS 1286: 2011 as follows:

$$LC = [1 - x / y] * 100$$

Where

x is the imported content in Rand

y is the bid price in Rand excluding value added tax (VAT)

Prices referred to in the determination of x must be converted to Rand (ZAR) by using the exchange rate published by South African Reserve Bank (SARB) at 12:00 on the date of advertisement of the bid as indicated in paragraph 4.1 below.

**INVITATION AND EVALUATION OF BIDS BASED ON A STIPULATED MINIMUM
THRESHOLD FOR LOCAL PRODUCTION AND CONTENT FOR RAIL SIGNALLING
SYSTEM AND ASSOCIATED COMPONENTS**

1. PURPOSE

- 1.1 The purpose of this Instruction note is to regulate the environment within which Accounting Officers (AOs) and Accounting Authorities (AAs) may procure rail-signalling systems and associated components as a sector for local production and content.

2. BACKGROUND

- 2.1 The Preferential Procurement Regulations, 2011 ("the regulations") issued in terms of Section 5 of the Preferential Procurement Policy Framework Act, 2000 (Act No 5 of 2000) which came into effect on the 7 December 2011, make provision for the Department of Trade and Industry (**the dti**) to designate sectors in line with the national development and industrial policies for local production.
- 2.2 Regulation 9 (1) of the Regulations prescribes that, in the case of designated sectors, wherein the award of bids for local production and content is of critical importance, such bids must be advertised with the specific bidding condition that only locally produced goods, services or works or locally manufactured goods, with a stipulated minimum threshold for local production and content, will be considered.
- 2.3 **the dti** has designated and determined the stipulated minimum threshold for rail signalling systems and associated components for local production and content.

3. SECTOR DESIGNATION

- 3.1 A rail signalling system is used to control the flow of railway traffic in a safe, efficient and reliable manner as a means of preventing trains from colliding with each other. Being guided by fixed rails, trains are uniquely susceptible to collision; furthermore, trains cannot stop quickly, and frequently operate at speeds that do not allow stopping within sighting distance of the driver. Also, rail signalling systems are one of the key factors to assure the safety, punctuality, reliability and effectiveness (train speed and traffic density) of the railway operation.
- 3.2 **Table 1** indicates the stipulated minimum local content for rail signalling systems and associated components.

Table 1: Rail signalling system

Types of systems	Local content thresholds
Rail Signalling System and associated components	65%

- 3.3 **Table 2** provides the stipulated minimum threshold for local content and production for rail signalling systems and associated components categorised by systems and components. To ensure that the minimum local content designated is applied on manufacturing activities, the components and conversion activities in the manufacture of rail signalling system and associated components are further designated and must also be included in bid invitations:

Table 2: Local Content Designated on a Fully-Built Unit and Components and Conversion Activities against which the overall Local Content must be discharged, per rail signalling system and components

No	Components and manufacturing processes against which the overall local content must be discharged	
	Components and manufacturing processes	% local content
1	Centralised Traffic Control (CTC) Equipment	40%
2	Cabinets (Apparatus cases)	100%
3	LED Light Signal	95%
4	Level Crossing Components	90%
5	Auxiliary Power Supplies	90%
6	Point Machines	90%
7	Cables & wire	90% (Cable instruction note)
8	Axle Counter	75%
9	Track Circuits	90%

**NATIONAL TREASURY DESIGNATED SECTORS INSTRUCTION NUMBER 10 OF 2016/2017

PRODUCTION AND CONTENT FOR RAIL SIGNALLING SYSTEM AND ASSOCIATED COMPONENTS**

No	Components and manufacturing processes against which the overall local content must be discharged	
	Components and manufacturing processes	% local content
10	Electronic Interlocking	50%
11	Relay Interlocking	90%
12	Assembly and testing of the fully-built units	100%
Total minimum local content (per system)		65%

- 3.4 The following primary input materials used in the manufacture of railway signalling systems and associated components are deemed as local in this designation:
- raw copper rod;
 - paper and boards for insulation;
 - aluminium billets and rod;
 - ceramics;
 - porcelain;
 - reinforced fibre glass;
 - polymers; and
 - epoxy.
- 3.5 The designated local content thresholds (on the components/conversion processes and on the overall) apply to new purchases, refurbishments, replacements and general overhauls.
- 3.5.1. For further information, bidders and procuring state organs may contact the Metals Fabrication, Capital and Rail Transport Equipment unit within the dti at telephone 012 394 1356/3138 or email Thandi Phele at tphele@thedti.gov.za.
- 3.6 Bid specifications for the rail-signalling system and associated components referred to above may be done in collaboration with the dti.

4. INVITATION OF BIDS FOR RAIL SIGNALLING AND ASSOCIATED COMPONENTS

- 4.1 Bids in respect of rail signalling system and associated components must contain a specific bidding condition which states that:
- Only locally manufactured rail signalling system and associated components with a stipulated minimum threshold for local production and content will be considered.
 - If the quantity, input materials and/or components of rail signalling systems and associated components cannot be wholly sourced from South African (SA)-based manufacturers to achieve the designated local content threshold, both on the overall and at the components and conversion processes levels, at any particular time of procurement or order placement, bidders entities should obtain written exemption from

the dti. **the dti**, in consultation with the SA industry and procuring Organ of State, will grant exemption on a case-by-case basis and will consider the following:

- a) required volumes in the particular bid;
 - b) available collective SA industry manufacturing capacity at that time;
 - c) delivery times;
 - d) availability of input materials and components;
 - e) technical considerations including operating conditions and technical compliance protocol;
 - f) quality and reliability;
 - g) materials of construction;
 - h) security of supply and emergencies;
 - i) localisation plans aimed at establishing and/or increasing local manufacturing capacity through ramping-up of capital investments in the initial phases; and
 - j) replacement of components on the existing infrastructure (i.e. track circuit procured prior to the implementation of this instruction notes) in order to honour the warranties and guarantees.
- 4.1.3. Bidders must clearly indicate in their bids the quantities of rail signalling systems and associated components to be supplied and the level of local content for each product.
- 4.1.4. Organs of State may contact **the dti** in instances where the stipulated minimum threshold for local content cannot be met in order for **the dti** to verify and, in consultation with the AO/AA, provide directives in this regard.
- 4.2 AOs/AAs must stipulate in bid invitations that:
- 4.2.1. the exchange rate to be used for the calculation of local production and content must be the exchange rate published by the South African Reserve Bank (SARB) on the date of advertisement of the bid; and
- 4.2.2. only the South African Bureau of Standards (SABS) approved technical specification number SATS 1286:2011 must be used to calculate local content.
- 4.3 The local content (LC) expressed as a percentage of the bid price must be calculated in accordance with the following formula which must be disclosed in the bid documentation:

$$LC = \left(1 - \frac{x}{y}\right) * 100$$

Where

x is the imported content in Rand

y is the bid price in Rand excluding value added tax (VAT)

- In the case of turnkey products/projects x and y will only refer to the value of rail signaling systems and associated components in the project.
- Prices referred to in the determination of x must be converted to Rand (ZAR) by using the exchange rate published by the SARB on the date of advertisement of the bid.

- 4.4 AOs/AAs must clearly stipulate in the bid documentation that the SABS-approved technical specification number SATS 1286:2011 and the Guidance on the Calculation of Local Content together with the Local Content Declaration Templates [Annex C (Local Content Declaration: Summary Schedule), D (Imported Content Declaration: Supporting Schedule to Annex C) and E (Local Content Declaration: Supporting Schedule to Annex C)] are accessible to all potential bidders on the dti's official website http://www.thedti.gov.za/industrial_development/ip.jsp at no cost.
- 4.5 For the purpose of paragraphs 4.1, 4.2 and 4.3 above, the attached Declaration Certificates for Local Production and Content (SBD/MBD 6.2) must form part of the bid documentation. Guidance Document for the Calculation of Local Content

1. DEFINITIONS

Unless explicitly provided in this guideline, the definitions given in SATS 1286:2011 apply.

2. GENERAL

2.1. Introduction

This guideline provides tenderers with a detailed description of how to calculate local content of products (goods, services and works) by components/material/services and enables them to keep an updated record for verification requirements as per the SATS 1286:2011 Annexure A and B.

The guideline consists of two parts, namely:

- a written guideline; and
- three declarations that must be completed:
 - Declaration C: “Local Content Declaration – Summary Schedule” (see Annexure C);
 - Declaration D: “Imported Content Declaration – Supporting Schedule to Annex C” (see Annexure D); and
 - Declaration E: “Local Content Declaration – Supporting Schedule to Annex C” (see Annexure E).

The guidelines and declarations should be used by tenderers when preparing a tender. A tenderer must complete Declarations D and E, and consolidate the information on Declaration C.

Annexure C must be submitted with the tender by the closing date and time as determined by the Tender Authority. The Tender Authority reserves the right to request that Declarations D and E also be submitted.

If the tender is successful, the tenderer must continuously update Declarations C, D and E with actual values for the duration of the contract.

NOTE:

Annexure A is a note to the purchaser in SATS 1286:2011; and
Annexure B is the Local Content Declaration IN SATS 1286:2011.

2.2. What is local content?

According to SATS 1286:2011, the local content of a product is the tender price less the value of imported content, expressed as a percentage. It is, therefore, necessary to first compute the imported value of a product to determine the local content of a product.

2.3. Categories: Imported and Local Content

The tenderer must differentiate between imported content and local content.

Imported content of a product by components/material/services is separated into two categories, namely:

- products imported directly by the tenderer; and
- products imported by a third party and supplied to the tenderer.

2.3.1. Imported Content

Identify the imported content, if any, by value for products by component/material/services. In the case of components/materials/services sourced from a South African manufacturer, agent, supplier or subcontractor (i.e. third party), obtain that information and Declaration D from the third party.

Calculate the imported content of components/materials/services to be used in the manufacture of the total quantity of the products for which the tender is to be submitted.

As stated in clause 3.2.4 of SATS 1286:2011: "If information on the origin of components, parts or materials is not available, it will be deemed to be imported content."

2.3.1.1. Imported directly by the tenderer:

When the tenderer import products directly, the onus is on the tenderer to provide evidence of any components/materials/services that were procured from a non-domestic source. The evidence should be verifiable and pertain to the tender as a whole. Typical evidence will include commercial invoices, bills of entry, etc.

When the tenderer procures imported services such as project management, design, testing, marketing, etc and makes royalty and lease payments, such payments relating to the tender must be included when calculating imported content.

2.3.1.2. Imported by a third party and supplied to the tenderer:

When the tenderer supplies components/material/services that are imported by any third party (for example, a domestic manufacturer, agent, supplier or subcontractor in the supply chain), the onus is on the tenderer to obtain verifiable evidence from the third party.

The tenderer must obtain Declaration D from all third parties for the related tender. The third party must be requested by the tenderer to continuously update Declaration D. Typical evidence of imported content will include commercial invoices, bills of entry etc.

When a third party procures imported services such as project management, design, testing, marketing etc. and makes royalty and lease payments, such payments relating to the tender must be included when calculating imported content.

2.3.1.3. Exempt Imported Content:

Exemptions, if any, are granted by the Department of Trade and Industry (**the dti**). Evidence of the exemptions must be provided and included in Annexure D.

2.3.2. Local Content

Identify and calculate the local content, by value for products by components/materials/services to be used in the manufacture of the total quantity of the products.
