Terms of Reference

1. INTRODUCTION

- 1.1. The Department of Agriculture, Land Reform and Rural Development (DALRRD) requires the supply, Installation and 3-year maintenance of Three (3) heating, ventilation and air conditioning (HVAC) floor system units for the three server rooms including the installation of a monitoring software for all units. at the chief directorate: national geospatial information office
- 1.2. The Chief Directorate: National Geo-spatial Information (CD: NGI) has Three server rooms that house ICT equipment central to daily operations:
 - (i) IT server room 101,
 - (ii) server room 167,
 - (iii) C-Block Server Room – Tape Library
- 1.3. These sever rooms require a controlled environment to prevent the equipment from overheating and eventually crashing. Currently all server rooms are equipped with the Liebert Hiross HPM, installed in 2007. The units are 15 years in service and require to be replaced.
- 1.4. In the past years we have experienced breakdowns and had to be fixed. They are currently not maintained however they are still functioning.
- 1.5. All these HVAC units in the Three server rooms must be maintained and constantly monitored to ensure proper functioning of IT equipment that contributes to the running and backing up of the technical and other data that is critical to the daily operations at the CD: NGI
- 1.6. The NGI server rooms are raised floor data centre construction model, leaving the open space between the two floors for wiring or cooling infrastructure and reduce the intake air temperature of IT equipment and servers. This raised flow accommodates network cables, electrical cables all which need to be constantly cooled.
- 1.7. Replacing the old HVAC units is crucial because the data centre equipment in all the NGI server rooms run 24/7. Replacing the HVAC units will ensure that the NGI operations are not interrupted by failing hardware caused by overheating.
- 1.8. The capacity HVAC unit must meet the floor size of each server room.
