CONTRACT PRICE ADJUSTMENT SCHEDULE

- The value of each monthly statement for payment, submitted to the Employer’s Agent by the Contractor, shall be increased or decreased by the amount obtained by multiplying “A_c” “(defined in Clause 2 of this Contract Price Adjustment Schedule) by the Contract Price Adjustment Factor, rounded off to the fourth decimal place, determined according to the formula:

$$(1 - x) \left[\frac{aL_t}{L_o} + \frac{bP_t}{P_o} + \frac{cM_t}{M_o} + \frac{dF_t}{F_o} - 1 \right]$$

In which the symbols have the following meaning:

“x” is the proportion of “A_o” which is not subject to adjustment unless otherwise stated in the Contract Data, this proportion shall be 0,10.

“a”, “b”, “c” and “d” are the coefficients contained in the Contract Data, which are deemed, irrespective of the actual constituents of the work, to represent the proportionate value of labor, Contractors’ equipment, material (other than “special materials specified in the Contract Data) and fuel respectively. The arithmetical sum of “a”, “b”, “c” and “d” shall be unity.

“L” is the “Labour Index”, “P” is the “Contractors’ Equipment Index”, “M” is the “Materials Index” and “F” is the “Fuel Index”, all as defined in the Contract Data.

The suffix “O” denotes the current indices applicable to the base month as stated in the Contract Data.

The suffix “t” denotes the current indices applicable to the month in which the last day of the relevant monthly statement relates.

If an index relevant to any particular monthly statement is unknown at the time when the monthly statement is prepared, the Contractor shall estimate the value of such index. Any correction required, when the correct indices become known, shall be made by the Contractor in subsequent monthly statements.

If the organization publishing the indices, changes any of the indices set out in the Contract Data, the Contractor shall use a correlation factor, which integrates the old and the new indices, for the adjustment of subsequent payment certificates.

- For the purpose of calculating the adjustment to the value of the relevant monthly statement, the amount “A_c” shall be determined by the formula:

$$A_c = T - S - D - E - G - A_p$$

In which formula the symbols shall have the following meaning:

“T” is the summation of the total value of

- General items
- Work done and

(iii) The materials on site

As certified in the monthly statement under consideration without any deduction whatsoever and before any adjustment made in terms of this Schedule.

"S" is the aggregate of (i), (ii), (iii), and (iv) referred to below and included in "T"

(i) The amount actually expended and substituted for any Prime Cost Sums;

(ii) The value of any work done by Selected Subcontractors;

(iii) The value of any work done against Provisional Sums,

(iv) The value of any extra or additional work;

Where special arrangements for price adjustments in respect of those amounts were made and recorded at the time the work was ordered.

"D" is the value of work included in "T" and done at new fixed rates, where those rates were not based on labour, Contractors' Equipment or materials costs in force at the time of tendering. Generally new rates may be based on current costs and descalated to the base month of the indices, in which case work done at these rates shall not be included in the value of "D".

"E" is the amount included in "T" and paid for any daywork carried out at cost plus percentage allowances as set out in General Conditions of Contract Clause 6.5.1.2.3.

"G" is the amount included in "T" for materials classified and dealt with as "special materials".

"Ap" is the summation of all "Ac" amounts determined in terms of Clause 2 of this Contract Price Adjustment Schedule for all monthly statement under consideration.

3. Save only for additional work, or variations ordered to be carried out after the Due Completion Date, the increase or decrease applied to monthly statements in terms of this Contract Price Adjustment Schedule, relating to work done, Plant and/or materials supplied after the Due Completion Date, shall be half the factor calculated by inserting the formula referred to in Clause 1 hereof, the indices Lt, Pt, Mt and Ft applicable at the Due Completion Date.
4. The price of each "special material" specified in the Contract Data shall be increased or decreased by the net amount of any variation incurred after the date of the tender on the basis set out in the Contract Data, provided that any claim for adjustment in terms hereof shall be substantiated by the submission of acceptable invoices and any other supporting documents that the Employers' agent considers necessary for the purpose, and provided also that no further adjustment be permitted to the price of any "special material" after Due Completion Date unless such material forms part of any additional work.
5. For the purpose of Clause 4 hereof, "the net amount variations" in respect of a particular "special" shall be calculated by multiplying the difference between the rate or price entered in the Contract Data by the Contractor for that material and the equivalent rate or price actually paid by the Contractor for the material by the quantity of the material in question.
6. If one month intervenes between the month applicable to any monthly statement and the month applicable to the immediately succeeding monthly statement, then the indices Lt, Pt, Mt and Ft applicable to such succeeding monthly statement shall each be arithmetic mean, rounded off to the second decimal place, of the relevant indices to the month of measurement and to such intervening months.

The contractor shall obtain his own information regarding species, occurrence and extent of vegetation to be controlled in order to comply with the required Standards.

Growth control shall be achieved by:

Within the Road Reserve – herbicide application in all hardened roads and road – edges, hardened side-walks, hardened walk-ways and hardened centre islands as well as kerb and channels. It shall be the contractor's responsibility at all times to ensure the continuity of growth control. The contractor will be required to seek permission from the engineer prior to undertaking any growth control measures. The weed killer to be used shall be "Round up" (Glyphosate) or some similar type of systemic, post-emergent, non-residual weed killer acceptable to the Engineer.

The contractor shall specify to the engineer the method of application, the type and quantity of weed killer to be used, in the initial and subsequent applications in respect of road reserves and rail reserves respectively

Herbicide that act as scorching agents (e.g with Parquet or similar active ingredient) shall not be used.

Vegetation and lawns beyond the targeted area must not be damaged and effects of herbicide application should be visually acceptable. To this end, the contractor shall recover hardened surfaces that have become covered with soil and growth by targeting this vegetation without damaging private or public lawns.

Control shall be such that there are no weeds or vegetation growth (including creepers) at any time. (Zero Tolerance). The requirement on the specified roads will be that no weeds will be permitted to exist (i.e zero tolerance) at any given time, which means the contractor is to spray and eradicate weeds on emergency or the instruction from the engineer. It shall be the contractor's responsibility at all times to ensure the continuity of growth control.

Where the required control has not been achieved, the engineer may notify the contractor to execute remedial work which may include the physical removal of plant growth and/or remains which pose a hazard, inconvenience or eye-sore, being necessary either before or after application of herbicides, as directed by the engineer.

The Contractor to exercise DUE CARE

The contractor at all-time exercise extreme care while applying the herbicides to ensure that trees, shrubs, hedges, lawns flowers, etc on verges or properties adjoining the treated areas or areas beyond the targeted area are not affected by accidental movement of the herbicide through wind, rain or transportation by water. They shall take particular precautions while working to prevent accidental contact with the herbicide by children, animals and or irresponsible persons. To this end the contractor shall;

- I. Utilize only such preparations as may be approved by the engineer
- II. Adhere strictly to the instructions of the manufacture of the compounds and additives being used
- III. Exercise proper care in the method of application and ensure that the procedures for the procurement, storage, handling, transportation, application, and general use of chemicals comply with all applicable legislation, Codes of Practice and Local, Regional or Provincial authorities regulations including but not restricted to;-
 - The Fertilizer, Farm Feeds, Agricultural Remedies and Stock Remedies Act (Act 36 of 1994) as amended.
 - The Hazardous Substance Act (Act 15 of 1973)
 - The Water Amended Act (Act 96 of 1984) (where applicable)

 - SABS Code of Practice No.0206-1987 "safety procedures for the disposal of surplus pesticides and associated toxic waste".
- IV. Ensure that his employees at all-time exercise care and consideration for the fauna and flora within adjacent to road and rail reserves
- V. Not apply any chemicals of an explosive, inflammable, highly volatile or corrosive nature which may damage crops or property or be hazardous to humans or animals. The contractor assumes full responsibility for the efficiency and safety of whatever chemical are used.
- VI. Undertake the work only under proper supervision and ensure that the work shall be carried out with due caution for work on, over, under, or adjacent on Roadways and near high voltage equipment.
- VII. Applying herbicide in neat continuous lines where this encroaching vegetation is targeted
- VIII. Not target vegetation beyond the hardened surfaces in an attempt to prevent potential encroachment
- IX. Contractor must comply with health and safety requirements related to safety, equipment, masks, goggles, gloves etc.

N.B: Contractor must be aware that if weeds on the road/s have been sprayed, and it rains before the chemical takes effect and there is no physical visible evidence of control during inspection by the engineer, the contractor will not be paid just because they sprayed the surfaces that required treatment. The contractor will have to re-spray the road/s and re-inspection for zero weed growth by the engineer before any submission of invoice will be considered for payment.

It is therefore vital that the contractor ensures that weather conditions are favorable to undertake the works of applying the weed killer to ensure that the effects of the chemicals are achieved in order to ensure that there is no weed growth.
