		TRAINING - Operation and Maintenance of pumps ACCREDITED TRAINING PROVIDERS WHO MEET THE MENTIONED CRITERIA MAY RESPOND WITH QUOTATIONS Accredited service providers who are interested in offering the <u>Operation and Maintenance of pumps</u> , training are kindly requested to respond to this advertisement with a quotation. The tenderer is required to submit their valid accreditation as an skills development provider with the quotation. Below are the specific outcomes that must be covered in the training. NB. This training is associated with Water Reticulation Practitioner - Level 4 curriculum, where the main outcome is to Operate and maintain a water reticulation system. <u>Specific Outcomes</u> 1. Operation of pumps is maintained through correct maintenance, removal and replacement operations for faulty pumps and repairs within scope of the WRP 2. Maintenance plan indicates understanding of preventative and emergency maintenance operations. 3. Preparations for maintenance show that consideration has been given to the allocation of tasks to team members, the organising, checking, loading and transport of materials and equipment, and management of time. 4. A range of relevant information pertaining to the operation and maintenance of infrastructure is obtained through the accurate interpretation of maps, construction, and site drawings. 5. Hazards and risks at the site of a water leak are identified, assessed, and mitigated and traffic is managed. 6. Water supply is reinstated through repairs on water leak, conducted according to appropriate procedures. 7. Correct isolation procedures are conducted before, and correct recharging procedures after maintenance and repair operations are carried out on valves, pumps, meters, and pipes. 8. Hazards and risks associated with repair and maintenance on valves, pumps and meters and confined spaces are identified, assessed, and mitigated. 9. Manufacturer specifications are adhered to. 10. All relevant safety precautions are adhered to. 11. The tasks are completed within the specified time. 12. No equipment, parts, and tools are damaged or lost. 13. An understanding of factors influencing operation and maintenance of the water reticulation infrastructure is demonstrated. The following documents must be submitted with each quotation: 1) Relevant accreditation documentation that is current and valid. NB. Failure to clearly highlight the accreditation on the documents that is submitted will result in disqualification 2) Provide a detailed scope 3) Provide 1 reference from reputable organisations indicating where your organisation has successfully completed this training before. References from Jwater will not be considered. 4) The tenderer must include the duration of the training in their quotation. (The training should not be more than 5 days) 5) Training must be done at one of the JWater sites, the service provider must provide the necessary training resources as per their accreditation when offering the training at our JWater site. The service provider must indicate that they will be able to offer the training at one of JWater sites. It is the service providers responsibility to liaise with the relevant JWater officials at the respective depot to coordinate the training. a) The training provider must submit attendance registers on the first day of the training and on the last day of the training when the course has been completed. b) The training provider must provide all statement of results and certification to JWater after the course has been completed. c) The price in the quotation must be in South African currency		30 people
