SECTION 3: BACKGROUND, OVERVIEW AND SCOPE OF REQUIREMENTS**1 BACKGROUND**

As part of its Cyber Security strategy and Risk Mitigation initiatives, Transnet needs to ensure the security of its network environment and protect against unauthorized access and data breaches. To achieve this, Transnet is seeking a service provider to offer a comprehensive Network Access Control (NAC) solution for a duration of three (3) years. The NAC solution will enhance network security, provide a secure work environment, and offer greater control, visibility, and compliance across Transnet's networks. Its primary goal is to safeguard Transnet's digital assets and mitigate the risk of sensitive data being compromised through Cyber Security attacks.

2 EXECUTIVE OVERVIEW

Whereas Transnet is seeking a partner(s) to provide solutions for its Network Access Control (NAC) solution nationally, it also seeks to improve its current processes for providing these Goods/Services to its end user community throughout its locations.

The selected Supplier/Service provider(s) must share in the mission and business objectives of Transnet. These mutual goals will be met by meeting contractual requirements and new challenges in an environment of teamwork, joint participation, flexibility, innovation and open communications. In this spirit of partnership, Transnet and its Supplier/Service provider(s) will study the current ways they do business to enhance current practices and support processes and systems. Such a partnership will allow Transnet to reach higher levels of quality, service and profitability.

Specifically, Transnet seeks to benefit from this partnership in the following ways:

- 2.1 Transnet must receive reduced cost of acquisition and improved service benefits resulting from the Supplier/Service provider's economies of scale and streamlined service processes.
- 2.2 Transnet must achieve appropriate availability that meets user needs while reducing costs for both Transnet and the chosen Supplier/Service provider(s).
- 2.3 Transnet must receive proactive improvements from the Supplier/Service provider with respect to supply/provision of Goods/Services and related processes.
- 2.4 Transnet's overall competitive advantage must be strengthened by the chosen Supplier/Service provider's leading edge technology and service delivery systems.
- 2.5 Transnet end users must be able to rely on the chosen Supplier/Service provider's personnel for service enquiries, recommendations and substitutions.
- 2.6 Transnet must reduce costs by streamlining its acquisition of Goods/Services, including managed service processes on a Group basis.

3 SCOPE OF REQUIREMENTS

DELIVERABLES

The proposed solution must have, but is not limited to, the following capabilities:

- 3.1 Authentication and Authorization: The solution should provide robust authentication mechanisms to verify the identity of users and devices before granting network access. It should also offer flexible authorization policies to enforce access privileges based on user roles, device type, location, and other attributes.
- 3.2 Endpoint Visibility: The NAC solution should provide comprehensive visibility into all endpoints connected to the network, including computers, servers, mobile devices, and Internet of Things (IoT) devices. It should gather information such as device type, operating system, patch level, installed software, and compliance status.
- 3.3 Endpoint Compliance and Health Checks: The NAC solution should perform continuous compliance checks on connected endpoints to ensure they meet security requirements and adhere to Transnet policies. It should verify the presence of up-to-date antivirus software, firewall configurations, and software patches, among other security measures.
- 3.4 Network Segmentation: The NAC solution should support network segmentation capabilities, allowing administrators to separate the network into distinct segments based on user roles, departmental requirements, or compliance regulations. This helps isolate and contain potential security threats and limit lateral movement within the network.
- 3.5 Threat Detection and Response: The NAC solution should integrate with threat detection and response systems to identify and respond to potential security incidents. It should provide real-time alerts, log events, and integrate with security information and event management (SIEM) platforms for comprehensive threat monitoring and response.
- 3.6 Policy Enforcement: The NAC solution should enforce security policies dynamically based on contextual information, such as user identity, device type, location, and time of access. It should have the ability to grant, deny, or restrict network access and apply appropriate policies based on predefined rules and conditions.
- 3.7 Guest Access and Onboarding: The NAC solution should include features to facilitate guest access to the network, allowing visitors or contractors to connect securely. This typically involves self-registration portals, temporary access credentials, and time-limited access privileges.

- 3.8 Scalability and Performance: The NAC solution should be scalable and capable of handling many simultaneous connections without significant performance degradation. It should be able to integrate with various network infrastructure components, such as switches, routers, and wireless access points, to manage access across the entire network.
- 3.9 Integration and Compatibility: The NAC solution should be compatible with existing network infrastructure, authentication systems, and security tools. Integration with other network management systems, such as identity and access management (IAM) solutions, is crucial for streamlined operations and efficient policy enforcement.
- 3.10 Reporting and Analytics: The NAC solution should provide comprehensive reporting and analytics capabilities to track and analyze network access trends, security incidents, compliance status, and policy violations. This information helps administrators make informed decisions, identify areas for improvement, and demonstrate regulatory compliance.

5.6 STEP FIVE: Post Tender Negotiations (if applicable)

- Respondents are to note that Transnet may not award a contract if the price offered is not market-related. In this regard, Transnet reserves the right to engage in PTN with the view to achieving a market-related price or to cancel the tender. Negotiations will be done in a sequential manner i.e.:
 - first negotiate with the highest ranked bidder or cancel the bid, should such negotiations fail,
 - negotiate with the 2nd and 3rd ranked bidders (if required) in a sequential manner.
- In the event of any Respondent being notified of such short-listed/preferred bidder status, his/her bid, as well as any subsequent negotiated best and final offers (BAFO), will automatically be deemed to remain valid during the negotiation period and until the ultimate award of business.
- Should Transnet conduct post tender negotiations, Respondents will be requested to provide their best and final offers to Transnet based on such negotiations. Where a market related price has been achieved through negotiation, the contract will be awarded to the successful Respondent(s).

5.7 STEP SIX: Objective Criteria (if applicable)

Transnet reserves the right to award the business to the highest scoring bidder/s unless objective criteria justify the award to another bidder. The objective criteria Transnet may apply in this bid process include:

- Respondents are to note that Transnet may not award a contract if the price offered is not market-related. In this regard, Transnet reserves the right to engage in PTN with the view to achieving a market-related price or to cancel the tender. Negotiations will be done in a sequential manner i.e.:
 - first negotiate with the highest ranked bidder or cancel the bid, should such negotiations fail,
 - negotiate with the 2nd and 3rd ranked bidders (if required) in a sequential manner.
- In the event of any Respondent being notified of such short-listed/preferred bidder status, his/her bid, as well as any subsequent negotiated best and final offers (BAFO), will automatically be deemed to remain valid during the negotiation period and until the ultimate award of business.
- Should Transnet conduct post tender negotiations, Respondents will be requested to provide their best and final offers to Transnet based on such negotiations. Where a market related price has been achieved through negotiation, the contract will be awarded to the successful Respondent(s).

5.8 STEP SEVEN: Award of business and conclusion of contract

Respondents are to note that Transnet will round off final pricing scores to the nearest 2 (two) decimal places.

Notes to Pricing:

- a) Respondents are to note that if the price offered by the highest scoring bidder is not market-related, Transnet may not award the contract to that Respondent. Transnet may-
 - (i) negotiate a market-related price with the Respondent scoring the highest points or cancel the RFP;
 - (ii) if that Respondent does not agree to a market-related price, negotiate a market-related price with the Respondent scoring the second highest points or cancel the RFP;
 - (iii) if the Respondent scoring the second highest points does not agree to a market-related price, negotiate a market-related price with the Respondent scoring the third highest points or cancel the RFP.

- c) Any disbursement not specifically priced for will not be considered/accepted by Transnet.

- e) Please note that should you have offered a discounted price(s), Transnet will only consider such price discount(s) in the final evaluation stage if offered on an unconditional basis.
- f) Respondents, if awarded the contract, are required to indicate that their prices quoted would be kept firm and fixed for the contract duration. [Not to be confused with bid validity period Section 2, clause 1]

- 1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30% of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIPP obligation on a *pro-rata* basis.
- 1.3 To satisfy the NIPP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.
- 1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

2. REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY

- 2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of **R10 million** (ten million Rands), submit details of such a contract to the DTI for reporting purposes.
- 2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1.
