**CLOSURE AND REHABILITATION OF UN-

SCOPE OF WORK /TERMS OF REFERENCE

SCOPE OF WORK FOR CLOSURE AND REHABILITATION OF UN- LICENSED MUNICIPAL DUMP SITE

TECHNICAL METHODOLOGY AND APPROACH

The main purpose of the project is to ensure that the implementation of the proposed End-Use Plan and to rehabilitate the dump site as to ensure that the site is environmentally and publicly acceptable and suited to the implementation of the proper end-use. Considering this, the technical approach will follow the prescribed processes relevant to the following guiding policies and legislations:

- National Environmental Management Act (NEMA) Act 107 of 1998 and its regulations
- National Environmental Management Act: Waste Act (NEMWA) Act 59 of 2008 and its regulations
- National Water Act (NWA) Act 36 of 1998 and its regulations
- Municipal Finance Management Act (MFMA) and Treasury Regulations
- Engineering Professions Act (EPA) Act 46 of 2000 and its Board Notices

The relevant guidelines:

- Public Participation Guidelines (2017)
- Need and Desirability Guidelines (2017)
- Minimum Requirements for Waste Disposal by Landfill (2005) Edition
- DEFF Capping closure of pollution point source in accordance with the 2018 guidelines <http://sawic.environment.gov.za/documents/1249.doc>

The application process for the intended project will be undertaken as per the provisions of the Act and the relevant regulations i.e. NEM: Waste Act and the relevant guidelines. This process will be aligned with the basic assessment process as stipulated in the Environmental Impact Assessment Regulations made under section 24(5) of the National Environmental Management Act, 1998 (Act No. 107 of 1998).

The scope of the project is two-fold; that is

- 1. Technical requirements**
- 2. Statutory requirements**

Scope on Technical requirements

In responding to the project objective, the minimum requirements published by the

Department of Water Affairs and Forestry will be utilised as a guide along with the DEFF capping closure guideline of 2018 . The minimum requirements stipulated that regardless of whether a landfill is permitted or not, it must be investigated before rehabilitation and closure can commence, so as to identify any closure requirements that must be implemented, see the illustration Figure 1 below provides the basic guideline for the closure of the Okhahlamba Dump Site.

Once the landfill has been rehabilitated in accordance with the Closure Report, the Permit Holder must notify the relevant authorities in writing of the intended closure of the site, at least 60 days prior to the event. Should the Department approve the condition of the landfill; the Permit Holder will be provided with written permission to close the site. The site may then be closed and the End-use Plan.

In response to the above, the following key tasks will be undertaken:

Task 1 – Site Survey

The appointed company must assume that an up to date site topographical survey is not available due to the ever-changing conditions on a landfill site. Therefore, it must have allowance for a survey to be completed on the closed site. The design cannot be carried out without a recent survey of the site. If this item is not required, it can be taken out of our costing.

Task 2 – Site Investigation

Appointed company will conduct a site investigation to determine the best suited rehabilitation options of the site. It must also familiarise itself with the site and the extent of the past disposal practices. This day will also be used to gather any historic information that is available for the site. It must also have a meeting with the applicable municipal agent to get the input from the municipality as well.

Task 3 – Prepare Concept Design

All the previous information for the site will be reviewed in preparation of the concept design. The appointed company will prepare concept designs for closure and rehabilitation of the site within the available budget.

Task 4: High Level Estimation

The said company will produce a high-level estimation of the design and prepare a Bill of Quantities for the project.

Task 5: Client Review

There must be a consultation with the client about the proposed solution before finalisation.

Task 6: Finalise Conceptual Designs and Reporting

The company will finalise the preferred option and prepare finalised concept design drawings and a report.

Task 5: Authority Review

For the rehabilitation of the landfill/dump site, the design has to be approved by the Department of Water and Sanitation. There must be an allowance for one meeting with DWS in Pretoria to discuss the designs and carry out the approval process. The appointed company cannot guarantee the timeframes of the approval process or that approval will be granted. This is completely in the hands of the authorities. It must also commit itself to amend the designs if required for approval by DWS.

Statutory Requirements Scope: The Environmental Authorisation (EA) Process

For the intended project for closure and rehabilitation of the Okhahlamba Dump Site it will follow the BAR process as part of the environmental authorisation process. This entails:

- ✓ Pre-Application Phase (Planning and Application for Authorisation)
- ✓ Verification of environmental triggers and to establish whether there are any additional specialist studies required.
- ✓ Basic Assessment Phase – this includes an assessment of the identified environmental impacts as well as putting in place mitigation measures
- ✓ Compilation of the Environmental Management Programme (EMPr)
- ✓ Compilation of a Closure Plan
- ✓ Detailed Public Participation
- ✓ Issuing of the Environmental Authorisation and Record of Decision

Stakeholder Engagement

- ❑ It should be noted that a large emphasis will be placed on stakeholder involvement as this has a significant impact on the success of the Landfill Site Closure and Rehabilitation projects and decision making.
- ❑ Stakeholder involvement is an integral part of all tiers of Environmental Impact Assessment, for which this project will entail a Basic Assessment. The Stakeholders can include anyone with an interest, from Government Ministers and Statutory Bodies, through to the public and local communities.
- ❑ However, there must be a clear differentiation of the interested and affected parties and the registered interested and affected parties. This need to be clearly communicated to them during the planning phases of the project to avoid confusion and any dissatisfaction during the implementation of the project.
- ❑ The project facilitation and stakeholder engagement (including overall project management) will be key to successfully deliver the expected outcomes of this project due to several stakeholders that are likely to be affected. This requires a dedicated project management role, and this needs to be sufficiently catered for in projects of this nature.
- ❑ To facilitate cooperation, the following is therefore proposed:
 - Communication strategy needs to be appropriately devised during the inception phase to ensure that all parties (include external stakeholders) agree to the plan and that there's a uniform understanding of the expectations.
 - During the project inception, the project team together with the client need to identify and agree on the external stakeholders that need be involved during the Environmental Screening Report process. This must be done to ensure that any possible conflicts are avoided in the early stages of the project.
 - A stakeholder engagement plan will be formulated during the inception and planning phase of the project to ensure that communication channels are adhered to by all parties throughout the project.
 - A database of IAPs and stakeholders should be developed at an early stage of the project and updated from time to time during the implementation of the project.
 - The medium for consultation would include, inter alia; public meetings focus group meetings, newspaper advertisement.

- It is also important to ensure that community members are also addressed in their own language.
- The International Association for Public Participation (IAP2) spectrum is the generally accepted point of reference for the various approaches that may be utilized for stakeholder engagement. The spectrum is illustrated in the table below.

NB: The final product of the above processes will be the closure permit/ rehabilitation permit.

The closure permit will be giving us the details of the actual rehabilitation and the end-use requirements.

The actual rehabilitation will be the final stage of the project.

- **Managing of the actual rehabilitation and post closure monitoring for the period of 24 Months.**

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1. This Municipal Bidding Document (MBD) must form part of all bids¹ invited.

1. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

2. Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - (a). take all reasonable steps to prevent such abuse;
 - (b). reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - (c). cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

3. This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

4. In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

MBD 9

6. The bidder has arrived at the accompanying bid independently from, and without consultation, communication, agreement or arrangement with any competitor. However communication between partners in a joint venture or consortium³ will not be construed as collusive bidding.
