

**Question**

Good day

I trust you are well, please see the emails below from the suppliers regarding paint specification for access ladder for the RFQ (TNPA/2024/10/0018/78678/RFQ) and advise on what the supplier should quote on.

Please see below emails from the Stoncor supplier with regards to the paint spec.

Noxyde, Peganox, OptiRustBusta and OptiMetal Coat - Yellow has been discontinued for years already.

If the client wants to use a Stoncor product the rep suggested the following:

CM15 & 137HS as per email below.

Otherwise, the other option is the Transnet Spec : TNPA Corrosion Protection Specification:  
CORROSION\_PROTECTION\_HE9\_2\_8VER\_16

I hope you will find the above in order.

**Answer:**

We have agreed not to change the paint specification. The service provider should continue reaching out to the other suppliers for the quote.
