1. REQUEST FOR PROPOSAL

To appoint an independent, professional and suitably qualified service provider to assist the Department of Economic Development, Environment, Conservation and Tourism (DEDECT) with compilation and publication of the North West Environment Outlook (NWEO) 2024.

The Compilation of the NWEO 2024 will be a process to update the current North West Environment Outlook of 2018. A number of other environmental programmes supporting sustainable development have been initiated and are ongoing in the province. Such programmes will also inform the NWEO Report.

The report should provide a comprehensive assessment of the present condition of the environment and the changes that took place since 2018, as well as a performance review of the options for actions provided in the 2018 report to assist the Province to do the proper planning for the progress towards sustainable development.

It is intended, through a tendering process, to appoint a service provider/s to assist the Department with the management of all the activities required to achieve the objectives as set out in this Terms of Reference. This will include the coordination, management and financial control of the activities of all elements related to the compilation and publication of the provincial Environment Outlook report.

2. BACKGROUND

In terms of Section 31(a) of the National Environmental Management Act 107 of 1998 (NEMA), every citizen and organ of state is entitled to have access to information relating to the state of the environment, and actual and potential threats to the environment.

Most importantly, the compilation and publication of the NWEO 2024 report will be in compliance with the National Environmental Management Laws Second Amendment Act, 2013 (Act 30 of 2013), which makes provision for national and provincial 'environment outlook' reporting as a legal requirement with effect from December 2014. Both the National Minister and Provincial MECs have to prepare Environment Outlook Reports every 4 years.

Therefore, in continuation with Environmental Reporting and to provide relevant and accurate information that will assist the authorities in decision-making with respect to the North West Environment, the North West DEDECT wants to embark on the process to compile and publish the NWEO 2024 report. The process to compile and publish the NWEO 2024 report follows the compilation of the North West Environment State of Environment/Outlook reports of 2018, 2013, 2008, 2002 and 1995.

The project forms part of the 5 year Strategic Plan of the NW DEDECT and the Sustainable Development Program of the Province.

3. AIM AND OBJECTIVES

The aim of the NWEO 2024 report is to give a description of the current state of the environment and to look at changes and trends that took place since 2018. Scenario planning is done to inform decision-makers of possible alternative options relating to the environment in going forward.

Objectives of the State of Environment Reporting Programme are as follows:

- Describe environmental issues in a provincial context;
- Provide objective, accurate and scientifically credible information about the condition (*current state*) and prospects (*changes and trends*) of the environment in the Province (*including an early warning of potential environmental problems in the province*);
- Provide vital information for authorities to make informed decisions relating to environmental management in order to support sustainable development;
- Continue the development of provincial environmental indicators, and report on these indicators;
- Provide responses to environmental deterioration that has occurred within the province;
- Report on the effectiveness of national and provincial policies and programs designed to respond to environmental change, including progress toward achieving environmental standards and targets;
- Make recommendations for strengthening environmental policies and/or programmes;
- Most importantly to inform the inhabitants of NW Province about their environment, raise environmental awareness amongst

communities and increase public understanding of environmental issues; and

- Align with the National State of Environment programs and initiatives.

4. STUDY AREA

The study area is the North West Province, comprising the four main district municipalities: Dr. Ngaka Modiri Molema; Dr. Kenneth Kaunda; Dr. Ruth Segomotsi Mompati; and Bojanala Platinum. These administrative districts will guide research into environmental issues within the Province.

5. SCOPE OF THE PROJECT

5.1 The expected phases of the project:

The project will have seven (7) phases, which are described below. It must be noted that a **proper stakeholder consultation process must form part of each phase of the project and has to be costed accordingly.**

a) Inception phase.

The appointed consulting team must meet with the relevant officials from the DEDECT to establish the following:

- A Project Management Team and a Project Steering Committee;
- Agree on the roles and responsibilities of each committee;
- Arrangements for the first meetings of these two committees;
- Confirm the scope of the project;
- Agree on time frames and deliverables;

- Agree on stakeholder groupings to be included in the consultation process.

DELIVERABLES: *i) Signed Service Level Agreement*

DELIVERABLES: *Issues and Indicators Report (Draft and final).*

c) Status Quo phase

This phase will cover a comprehensive analysis of the current state of the environment in the Province. The analysis should be based on specialist studies conducted for each of the major themes confirmed at the provincial workshop.

DELIVERABLES: *Status Quo Report (Draft and Final).*

d) Compilation of NW Provincial Environment Outlook 2024

The service provider will be expected to compile the report as per the identified themes/ chapters as well as source the pictures to be used in the report. The Provincial Photo bank will be used where possible.

The compilation of the report should be in line with the workshopped and agreed methodology to describe the current state or the condition of

the environment, the underlying forces that exert an influence on the biophysical environment, the impacts and actions taken by society to minimize negative environmental impacts and maximize positive environmental impacts.

The service provider will be expected to appoint an external peer reviewer to review the final draft. The peer reviewer must be approved by the Project Management Team before appointment.

The final output of the Environment Outlook will be a comprehensive State of Environment (SoE) report based on identified issues and indicators. The SoE will take the 2018 Environment Outlook into consideration in establishing trends in the SoE. **Outlook scenarios** will be developed for a specified timeframe based on the findings of the SoE.

The development and maintenance of the NWPEIPS follows the compilation of comprehensive North West State of Environment reports in 2018, 2013, 2008, 2002 and the 1995, which, in the modern day, represents the old era of environmental information dissemination. Printed hard copies, CDs and posters were common methods of information dissemination, and this is a thing of the past which is characterized by its own challenges. The NWPEIPS aims to create a new era of environmental information provision that takes full advantage of the opportunities presented by the information age. The North West DEDECT is intending, through a tendering process, to appoint a service provider to compile and publish the North West Provincial Environment Information Provision System (NW PEIPS).
