Dear Sir/Madam

Request for Enquiry Number	WCKBG1167AB
Description / Project Title	The Supply and Delivery of Lithium Hydroxide Monohydrate to Koeberg Nuclear Power Station
Tender Questions Closing Date	20 February 2024

Item	Questions	Answers	Clarity Published Dates
1	I am enquiring about the process of clarification for Tender WCKBG1167AB (SUPPLY AND DELIVERY OF LITHIUM HYDROXIDE MONOHYDRATE TO KOEBERG NUCLEAR POWER STATION), can clarification questions be sent to you directly via email? Or should we request a clarification meeting?	You can send the questions to me directly however I will post the answers together with the questions on the Eskom tender Bulletin and National Treasury.	2024-02-06
2.	Please see below our clarification questions for WCKBG1167AB.

2.1	Please clarify the quantity, is 39 kg the amount by compound (7LiOH-H ₂ O) or by isotope?	39Kg is the total mass of the compound	2024-02-06
2.2	We have a number of clarifications regarding the list of required documents, as below, questions highlighted in red:		
2.2.1	Product Certificate of Authenticity (COA); is this the same as Certificate of Analysis?	Certificate of Authenticity is not the same as the certificate of analysis and we want the later (analysis)	2024-02-06
2.2.2.1	As part of the quality assessment criteria, you must provide: 1) COA- Certificate of analysis of the product requested as per DSG-313-002, standard DSG-313-002? Are there any requirements for a Certificate of Analysis?...	Certificate of Analysis contains results for impurities that were tested, and we check acceptability using the DSG-313-002, if the levels of impurity are less than the acceptable limits as per thee the DSG then the product meets the criteria.	2024-02-06
2.2.2.2	...Usually the certificate is sent with the product and is issued for each shipment. Can we send a sample without signature and stamp...	No	2024-02-06
2.2.2.3	...or must there be a certificate for products manufactured within the last year and issued for a specific period of time prior to the tender date?	Year to year and a half	2024-02-06
2.2.3	1) Certificate of distributor or manufacturer, ISO? Or other certification?	This is a letter from the OEM if the supplier is not the OEM that they have authorisation to supplier the product.	2024-02-06

2.2.4	2) Confirm experience of similar deliveries over the past 5 years, Will a letter on company's letterhead be enough?	This speaks to proof that the manufacture has supplied any Nuclear Power Stations with the same product.	2024-02-06
2.2.5	3) The product must meet the criteria of DSG-313-002 and have a shelf life of at least 2 years into the future. Again the question about the criteria of DSG-313-002. In the documentation there is a reference to the EDF specification, will the notification of long-term deliveries of NCCP products to EDF be enough?	This can support point 2) above. Otherwise, this point is requesting that the product they supply must have an expiry date of at least 2 years into the future.	2024-02-06
3.	Please confirm 39kg is the size that should be supplied.	39Kg is the quantity that needs to be supplied. Refer to 2.1 above.	2024-02-06
