THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME

INTRODUCTION

The National Industrial Participation (NIP) Programme, which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIP requirements. NIP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

1 PILLARS OF THE PROGRAMME

- 1.1 The NIP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US\$ 10 million or other currency equivalent to US\$ 10 million will have a NIP obligation. This threshold of US\$ 10 million can be reached as follows:
- (a) Any single contract with imported content exceeding US\$10 million.
or
 - (b) Multiple contracts for the same goods, works or services each with imported content exceeding US\$3 million awarded to one seller over a 2 year period which in total exceeds US\$10 million.
or
 - (c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US\$10 million.
or
 - (d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US\$ 3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US\$10 million.
- 1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30 % of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIP obligation on a *pro-rata* basis.
- 1.3 To satisfy the NIP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.

- 1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

2 REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY

- 2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of **R10 million** (ten million Rands), submit details of such a contract to the DTI for reporting purposes.

- 2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1. (d) above.

3 BID SUBMISSION AND CONTRACT REPORTING REQUIREMENTS OF BIDDERS AND SUCCESSFUL BIDDERS (CONTRACTORS)

- 3.1 Bidders are required to sign and submit this Standard Bidding Document (SBD 5) together with the bid on the closing date and time.

- 3.2 In order to accommodate multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as indicated in sub-paragraphs 1.1 (b) to 1.1 (d) above and to enable the DTI in determining the NIP obligation, successful bidders (contractors) are required, immediately after being officially notified about any successful bid with a value in excess of R10 million (ten million Rands), to contact and furnish the DTI with the following information:

- Bid / contract number.
- Description of the goods, works or services.
- Date on which the contract was accepted.
- Name, address and contact details of the government institution.
- Value of the contract.
- Imported content of the contract, if possible.

- 3.3 The information required in paragraph 3.2 above must be sent to the Department of Trade and Industry, Private Bag X 84, Pretoria, 0001 for the attention of Mr Elias Malapane within five (5) working days after award of the contract. Mr Malapane may be contacted on telephone (012) 394 1401, facsimile (012) 394 2401 or e-mail at Elias@thedti.gov.za for further details about the programme.

4 PROCESS TO SATISFY THE NIP OBLIGATION

- 4.1 Once the successful bidder (contractor) has made contact with and furnished the DTI with the information required, the following steps will be followed:
- a. the contractor and the DTI will determine the NIP obligation;
 - b. the contractor and the DTI will sign the NIP obligation agreement;

- c. the contractor will submit a performance guarantee to the DTI;
- d. the contractor will submit a business concept for consideration and approval by the DTI;
- e. upon approval of the business concept by the DTI, the contractor will submit detailed business plans outlining the business concepts;
- f. the contractor will implement the business plans; and
- g. the contractor will submit bi-annual progress reports on approved plans to the DTI.

4.2 The NIP obligation agreement is between the DTI and the successful bidder (contractor) and, therefore, does not involve the purchasing institution.

1. Background

The non-medical use of illicit opioids, specifically heroin consisting of concoctions (known locally as nyaope, or whoonga) and inappropriate and over prescription of licit opioids pose public health and social problems. Opioid Substitution Therapy (OST) also known as Opioid Agonist Therapy (OAT) is the gold standard for the treatment of opioid dependence (WHO 2009). Methadone and buprenorphine are recommended medications for OAT (WHO 2009). In general, methadone is recommended over buprenorphine, because it is more effective and cost less (WHO 2009). OAT decreases opioid use and the associated effects, reduces the risk of blood borne infectious disease, improves health, and reduces engagement in criminal activities (Goeieman et al 2023).

Currently the use of methadone in the public sector is limited to short term withdrawal management at the hospital level. The limitation with short term use of methadone includes among others the high rate of relapse and increased risk of mortality on return to use. Following a motivation for expansion of methadone to include OAT for use at the primary health care level submitted to the National Essential Medicine List Committee (NEMLC) for review, a recommendation was made that an implementation research project on OAT in selected public health facilities be conducted. Findings from the implementation research will help to inform the roll out OAT in the country in a safe, cost-effective and efficient way.

2. Overview of Opioid Agonist Therapy (OAT)

Opioid Agonist Therapy (OAT) is a combination of specific pharmacological and psychosocial interventions to reduce illicit opioid use and its related harm. Currently there are private organisations that implement OAT on a lesser scale in South Africa. Although OAT is being implemented in the private sector as well as through donor funded private sector projects, the feasibility, acceptability, and effectiveness of providing OAT in South African Public Health Care facilities is not known. For sustainability and access purposes, OAT would be better implemented through the Primary Health Care system like any chronic treatment. In view of the medical and

psychosocial expertise and resources that are required to implement OAT and the need for easy access by the clients who will need to visit the facility on daily basis for direct observed treatment purposes, community health care centers would be the better equipped primary health care facilities to render this service. It is therefore imperative to explore and understand the implementation of OAT in Primary Health Care facilities with a focus in community health care centers.

The purpose of the study is to generate an understanding of the feasibility, acceptability, and effectiveness of providing OAT in the public community health care centres (CHCs) in South Africa. Lessons learned from the project will inform the incremental roll-out of this intervention in the country.

3. Objectives of the project

- To assess feasibility of implementing OAT in a CHC setting;
- To develop Standard Operating procedures for OAT. The Standard Operating procedures should be based on the relevant WHO guidelines (WHO 2009), the NEMLC Mental Health Conditions Opioid Dependence Non-EML Protocol and the OST Checklist for Provincial Pharmaceutical and Therapeutics Committees (PTCs) suitable for use in a CHC settings in South Africa. These will be provided to the successful bidder;
- To develop training, orientation and information materials for different categories of staff in the selected facilities and stakeholders on OAT;
- To train all the staff, approximately 160 officials (about 80 officials per facility) in the implementing facilities including but not limited to managerial staff, clinical staff, administration staff, general and security staff;
- To propose a patient flow suitable for clients on OAT who need to come to the facility on daily basis for their daily dose;
- To observe the implementation of OAT in the selected facilities against a set criteria and document the findings regarding the feasibility, acceptability, safety and effectiveness of providing OAT in the selected CHCs;

- To make recommendations to address the identified gaps and to build on the identified strengths to strengthen access to safe and quality OAT in community health care centers including measures to prevent diversion for illegitimate purposes; and
- To strengthen intersectoral collaboration.

4. Scope of work

The duration of the project is 20 months. The following activities and outputs are expected from the project.

Phase one, 10% payment (two months)

- Develop a Project Plan;
- Development of Research Proposal (including situational analysis, data collection tools, based on the two CHCs selected; and
- Obtain inputs on the proposal from the Department, integrate inputs and submit for ethical approval.

Phase two: 10 % payment (Three months)

- Development of staff and stakeholders training, orientation and information materials based on the World Health Organization Guidelines for the Psychosocially assisted Pharmacological Treatment of Opioid Dependence, Mental Health Conditions Opioid Dependence Non-EML Protocol and OST Checklist for Provincial PTCs developed by the National Essential Medicine List Committee (NEMLC) and findings from the situational analysis; and
- Develop an observation tool.

The research protocol will entail a mixed method approach in two Ideal community health care centres (CHCs), one in Mpumalanga (Emalahleni Sub-District), and one in North-West Province (Madibeng Sub-district). These sub-districts are proposed due to a high number of people who use opioids/heroin concoctions who would be potential clients for OAT as well as availability of CHCs that have the minimum resources that are required to implement OAT. As much as possible, one CHC should be in a residential area and one in town/CBD to learn lessons from the different settings.

Dependence, the Mental Health Conditions Opioid Dependence Non-EML Protocol and OST Checklist for Provincial PTCs by NEMLC, and the findings from the situational analysis.

4.5 Training and Orientation of relevant officials on OAT implementation

Training will be provided at or as near as possible to the study site. The Department of Health will provide logistics such as venue, refreshment during training.

4.6 Selection and Recruitment of participants

The recruitment of participants will be based on the protocol that will be agreed upon between the service provider and the Department. The Department of Social Development affiliated treatment centres would have to be engaged to assist with identification and referral of clients with opioid dependence that are likely to benefit from the programme.

Health care providers- Officials will be purposefully sampled from health care providers and support staff where OAT is being implemented to participate in key informant interviews, focus group discussions, and orientation on OAT implementation.
