Initial \_\_\_\_\_

## **C2.1 PRICING INSTRUCTIONS**

### **1. GENERAL**

This section provides the tenderer with guidelines and requirements with regard to the completion of the Bill of Quantities. The Schedule has to be completed in black ink and the tenderer is referred to the arithmetical errors. The Bill of Quantities forms part of the Contract Documents and must be read and priced in conjunction with all the other documents comprising the Tender Documents which include the Conditions of Tender, Conditions of Contract, the Specifications (Scope of work/site information including the Project Specification), and the Drawings, as cross referenced.

The nature and extent of the work is to be ascertained by reference to all the documents comprising the Contract. Where Clause references are contained in item descriptions, these are given for guidance only and are not exclusive to other relevant provisions of the Contract.

State the rates and prices in Rand unless instructed otherwise in the tender conditions.

Any entry made by the Tenderer in the Bill of Quantities, form, etc., which the tenderer desires to change, shall not be erased or painted out. A line shall be drawn through the incorrect entry and the correct entry shall be written above in black ink and the full signature of the Tenderer shall be placed next to the correction.

### **2. DESCRIPTION OF ITEMS IN THE SCHEDULE**

The Bill of Quantities has been drawn up generally in accordance with the project and particular specifications.

The short descriptions of the items in the Bill of Quantities are for identification purposes only and the measurement and payment clause of the Standardised Specifications and each Particular Specification, read together with the relevant clauses of the Project Specification and directives on the drawings, set out what ancillary or associated work and activities are included in the rates for the operations specified.

### **3. QUANTITIES REFLECTED IN THE SCHEDULE**

The quantities given in the Bill of Quantities are estimated quantities only and will be subject to re-measuring during the execution of the work. Where quantities or sums are indicated as "Provisional", the Employer reserves the right to adjust the quantity or sum upwards or downwards as necessary, or the item can be omitted altogether. The Contractor shall obtain the Employer detailed instructions for all work before ordering any materials or executing work or making arrangements for it.

The Works as finally completed in accordance with the Contract shall be measured and paid for as specified in the Bill of Quantities, and the contract price for the completed contract shall be computed at the relevant unit rates and prices, all in accordance with the General and Special Conditions of Contract, the Specifications and Project Specifications, and the Drawings, et. Unless otherwise stated, items are measured net in accordance with the Drawings, and no allowance has been made for waste.

The validity of the contract will in no way be affected by differences between the quantities in the Bill of Quantities and the quantities finally certified for payment.

### **4. PRICING OF THE SCHEDULE**

The prices and rates to be inserted by the Tenderer in the Bill of Quantities shall be the full inclusive prices to be paid by the Employer for the work described under the several items, and shall include full compensation for all costs and expenses that may be required in and for the completion and maintenance during the defects liability period of all the work described and as shown on the drawings as well as all overheads, profits, incidentals and the cost of all general risks, liabilities, and obligations set forth or implied in the documents on which the Tender is based. Reasonable unit rates and prices shall be entered in the Bill of Quantities as these will be used for the assessment of payment for any additional work that may have to be carried out.

All prices shall be tendered in accordance with the units specified in this schedule. Where a value is given in the "Quantity" column, a Rate and Price is required to be inserted in the relevant columns. Each item shall be priced and extended to the "Total" column by the Tenderer, with the exception of the items for which "rate only" is required or items which already have Prime Cost or Provisional Sums affixed thereto. If the Contractor omits to price any items in the Bill of Quantities, then these items will be considered to have a nil rate or price.

Initial \_\_\_\_\_

All items for which terminology such as "inclusive" or "not applicable" have been added by the Tenderer will be regarded as having a nil rate which shall be valid irrespective of any change in quantities during the execution of the Contract.

All rates and amounts quoted in the Bill of Quantities shall be in Rand and shall include all levies and taxes (other than VAT). VAT will be added in the summary of the Bill of Quantities.

## 5. CORRECTION OF ENTRIES

## 8. ARITHMETICAL ERRORS

Check responsive tenders for discrepancies between amounts in words and amounts in figures. Where there is a discrepancy between the amounts in figures and the amount in words, the amount in words shall govern.

Check the highest ranked tender or tenderer with the highest number of tender evaluation points after the evaluation of tender offers in accordance with 6.11 for

- a) the gross misplacement of the decimal point in any unit rate,
- b) omissions made in completing the pricing schedule or bill of quantities, or
- c) arithmetical errors in

1) line-item totals resulting from the product of a unit rate and a quantity in bill of quantities or schedules of prices, or

2) the summation of the prices.

Notify the tenderer of all errors or omissions that are identified in the tender offer and either confirm the tender offer as tendered or accept the corrected total of prices.

Where the tenderer elects to confirm the tender offer as tendered, correct the errors as follows:

d) If a bill of quantities or pricing schedules apply and there is an error in the line-item total resulting from the product of the unit rate and the quantity, the line-item total shall govern, and the rate shall be corrected. Where there is an obviously gross misplacement of the decimal point in the unit rate, the line-item total as quoted shall govern, and the unit rate shall be corrected.

e) Where there is an error in the total of the prices either as a result of other corrections required by this checking process or in the tenderer's addition of prices, the total of the prices shall govern, and the tenderer shall be asked to revise selected item prices (and their rates if bill of quantities apply) to achieve the tendered total of the prices.

Consider the rejection of a tender offer if the tenderer does not correct or accept the correction of errors in the required manner.

## PRICE ADJUSTMENTS

### A. NON-FIRM PRICES SUBJECT TO ESCALATION

1. IN CASES OF PERIOD CONTRACTS, NON FIRM PRICES WILL BE ADJUSTED (LOADED) WITH THE ASSESSED CONTRACT PRICE ADJUSTMENTS IMPLICIT IN NON FIRM PRICES WHEN CALCULATING THE COMPARATIVE PRICES
2. IN THIS CATEGORY PRICE ESCALATIONS WILL ONLY BE CONSIDERED IN TERMS OF THE FOLLOWING FORMULA:

$$Pa = (1 - V)Pt \left( D1 \frac{R1t}{R1o} + D2 \frac{R2t}{R2o} + D3 \frac{R3t}{R3o} + D4 \frac{D4t}{D4o} \right) + VPt$$

**Where:**

Pa = The new escalated price to be calculated.

(1-V) Pt = 85% of the original bid price.

**Note that Pt must always be the original bid price and not an escalated price.**

D1, D2. = Each factor of the bid price e.g. labour, transport, clothing, footwear, etc.  
The total of the various factors D1, D2...etc. must add up to 100%.

R1t, R2t..... = Index figure obtained from new index (depends on the number of factors used).

R1o, R2o = Index figure at time of bidding.

VPt = 15% of the original bid price.

This portion of the bid price remains firm i.e. it is not subject to any price escalations.

3. The following index/indices must be used to calculate your bid price:

Index..... Dated.....      Index..... Dated.....      Index..... Dated.....

Index..... Dated.....      Index..... Dated.....      Index..... Dated.....

4. FURNISH A BREAKDOWN OF YOUR PRICE IN TERMS OF ABOVE-MENTIONED FORMULA. THE TOTAL OF THE VARIOUS FACTORS MUST ADD UP TO 100%.

FACTOR (D1, D2 etc. eg. Labour, transport, material, etc.)	PERCENTAGE OF BID PRICE
D1	15%
D2	20%
D3	55%

## B. PRICES SUBJECT TO RATE OF EXCHANGE VARIATIONS

- Please furnish full particulars of your financial institution, state the currencies used in the conversion of the prices of the items to South African currency, which portion of the price is subject to rate of exchange variations and the amounts remitted abroad.

Scope of Work (Data) associated with a Work Package	
TOPIC	COMMENTARY
DESCRIPTION OF THE GOODS	
Employer's objectives	<p>The Employer is undertaking the construction of a dam that requires long-term structural integrity, watertight performance, and controlled concrete behaviour under varying environmental and loading conditions. The integration of waterstops and plastic components such as crack inducers and crack directors is essential to achieving these outcomes.</p> <p>These components are to be embedded in or placed adjacent to concrete joints and surfaces to:</p> <ul style="list-style-type: none"> <li>• Prevent uncontrolled cracking</li> <li>• Direct and control the formation of shrinkage or movement-induced cracks</li> <li>• Ensure long-term impermeability of construction and expansion joints</li> <li>• Minimise maintenance and repair over the dam's operational lifespan</li> </ul> <p>The correct selection, supply, and installation of these materials are critical to the structural and hydraulic performance of the dam and its associated concrete works.</p>
General description of the goods	<p><b>General Description of the Goods</b></p> <p>The scope of this tender involves the supply and delivery of waterstops, crack directors, and crack inducers for use in the construction of the Clanwilliam dam. These products are essential components in ensuring the structural integrity, durability, and watertightness of concrete elements within hydraulic infrastructure.</p> <p>Waterstops are flexible, impermeable elements designed to prevent the passage of water through concrete joints in the dam structure. They will be installed in both expansion and construction joints and must be resistant to water pressure, chemicals, and movement caused by thermal expansion, contraction, or settlement. The required types include:</p> <ul style="list-style-type: none"> <li>• PVC waterstops (internal and external types)</li> <li>• Hydrophilic rubber waterstops</li> </ul> <p>Waterstops must be compatible with roller compacted concrete and resistant to chemicals, alkalis, chlorides, and UV</p>

	<p>radiation, where exposed. Selection should consider joint movement capacity, durability, and compliance with SANS, SABS, or international equivalent standards (e.g., ASTM or BS EN).</p> <p>Crack directors are devices or inserts used to control and guide the location of cracking in concrete due to shrinkage or thermal effects. They help in maintaining the long-term structural performance of the dam by ensuring cracks occur in predetermined, non-critical locations.</p> <p>Crack inducers are similarly designed to control cracking in large concrete pours by inducing shrinkage cracks at specific locations. This minimizes random cracking and contributes to the durability and functionality of the dam.</p> <p>In addition to the supply of the above items, the successful bidder will be required to provide:</p> <ul style="list-style-type: none"> <li>• Technical datasheets and compliance certificates</li> <li>• On-site technical support and installation training (as required)</li> <li>• Quality assurance documentation</li> <li>• Storage and handling guidelines</li> <li>• Delivery scheduling and logistics coordination with the construction team</li> </ul>
