PANEL OF SERVICE PROVIDERS FOR THE SUPPLY, DELIVERY AND OFFLOADING OF AGRO-CHEMICALS AND FERTILIZERS FOR A PERIOD OF 36 MONTHS IN THE FOUR DISTRICTS OF MPUMALANGA PROVINCE

2. INTRODUCTION

The Department of Agriculture, Rural Development, Land, and Environmental Affairs hereby invite prospective Bidders who have the necessary accreditation, skills and capacity to supply and deliver Agro-chemicals and Fertilizers in the Mpumalanga Province for the period of 36 months.

3. BACKGROUND

Massification of Crop production is one of the key priority areas to address food insecurities. Food Security is an intervention strategy aimed at mobilizing and supporting the people especially rural households to return to utilisation of agricultural land for own food production as a livelihood. The Department therefore introduced food security programme and supported farmers with the production means like, productions inputs and mechanization. Food security is attributed to the ability of all people, at all times, to have physical and economic access to sufficient, safe, nutritious food to meet their dietary needs and food preferences for an active life.

Seed treatment chemicals are applied to seed in order to protect it from pathogens that may damage the seed in storage, during the initial planting of the seed or during the early growth of the seedling. Beyond crop protection, seed treatment chemicals also have been shown to increase germination rates, vigour and root development. Seed treatment loading rate analysis is used to assist seed producers in determining the accuracy of the application of seed treatment chemicals to a wide variety of seeds. Every seed treatment chemical is registered and labelled for specific types of seed at specified loading rates.

The use of this service is important to ensure the seed is not undertreated and risking loss of protection, or over-treated, which wastes money and affects seed health. There is also the need to comply with local, state and federal laws while managing liability and to protect industry reputation.

During the seed treatment chemical application process, it is crucial to identify and then limit the sources of variability. Some examples of variability in the treating

PANEL OF SERVICE PROVIDERS FOR THE SUPPLY, DELIVERY AND OFFLOADING OF AGRO-CHEMICALS AND FERTILIZERS FOR A PERIOD OF 36 MONTHS IN THE FOUR DISTRICTS OF MPUMALANGA PROVINCE

process are the manufacture of seed treatment chemicals, the formulation of the seed treatment solution(s), the mixing of the chemical slurry, the application of the seed treatment slurry and the sampling of the treated seed sent for loading rate analysis. Without understanding the potential sources of variability in the process, it is difficult to ensure the sample sent is representative of the treated seed.

Fertilizers are chemical substances supplied to the crops to increase their productivity. These are used by the farmers daily to increase the crop yield. The fertilizers contain the essential nutrients required by the plants, including nitrogen, potassium, and phosphorus. They enhance the water retention capacity of the soil and also increase its fertility.

Fertilizers can be important to the plants in the following ways:

- Fertilizers increase plants' tolerance towards pests. This has reduced their reliance on insecticides and herbicides, thereby, producing healthier crops. Consequently, diseases have reduced, providing aesthetic value to the crops.
- The potassium content present in the fertilizers strengthens the straws and stalks of the plants.
- The phosphorus present in the fertilizers helps in the faster development of roots and formation of seeds in the plants.
- Nitrogen in the fertilizers enhances the growth of the plants which can be characterized by the green colour of the plants.

The appointed bidders will supply, deliver and offload Agro- Chemicals and Fertilizers for all Agricultural Production in Mpumalanga Province as and when required as per specification of the requesting official. The Agro-chemicals and Fertilizers will be used for a number of Agricultural activities among others but not limited to planting, top dressing, etc. The successful bidder will be expected to offer the services for a period of 36 months.
