8. INTRODUCTION

This Request for Proposals (RFP) is an effort for the Dawid Kruiper Municipality (DKM) to partner and work with the Private Sector to assist with the roll-out of Smart meters (Electricity and Water) at households and businesses.

Dawid Kruiper Municipality has identified itself as a catalyst municipality and has shown to have the potential to be the first municipality to be fully “smart” regarding the utility meters (electricity and water).

One of the major challenges that the municipality is experiencing is the current funding budget available and subsequently the municipality will not achieve the goal of eradicating non-smart meters in the next few years or even decades.

The request for proposals aims to invite all stakeholders to draw up a comprehensive proposal on how the Private Sector can contribute to this challenge and contribute to the successful eradication of the municipality’s non-smart meter backlog.

The municipality identified a need to appoint a developer to privately fund and project manage the roll out of the Smart meters and fast track the delivery while addressing the backlog of non-smart meter in the municipality’s jurisdiction.

9. BACKGROUND AND CONTEXT

Due to the ever-increasing theft of electricity as well as water that the Dawid Kruiper Municipality is experiencing due to tampering of non-smart meters, the need for the installation of smart meters (electricity and water) have become significantly apparent as an alternative to curb the theft.

Several lessons have been learnt about project management and implementation in respect of state subsidised projects and the role of the private sector. Key among these lessons is that well-planned and well-executed priority projects can deliver Smartmeters (electricity and water) at an accelerated pace, particularly in the face of the rising theft. Furthermore, there must be balanced partnerships where the risks and proceeds are carried equally by all parties in the partnership, there is effective contracting and governance, and a clear empowerment and transformation pathway exist.

10. PURPOSE

To invite Private Developers to submit Proposals (RFP), for appointment of a developer who will privately fund, and project manage the roll out of Smartmeters (electricity and water) program and fast track the delivery. The meters will become the assets of the municipality upon installation.

The Developer should also be able to deliver Smartmeters at scale and at an accelerated pace. The Developer should have the capacity to successfully execute the project through the means of self-funding. The municipality will then repay the debt to the Developer over a period not less than 7 years, but not exceeding 10 years. This will be done from the additional income being received due to the installation of the smartmeters.

The respondent/s should be a Developer with a reputable track record, should also indicate its financial capacity or the financial capacity of their Funder.

Respondents are to submit detailed proposals on how this project can be self (privately) funded and project managed throughout the construction phase of the project. The respondent should also include a repayment schedule indicating how the municipality are to repay the debt over a period not less than 7 years, but not exceeding 10 years. All

interest charges must be clearly stipulated so that an assessment can be made in terms of value for money (if applicable to the funding model). This proposal should be in accordance with the specifications recorded in this RFP as elaborated further.

11. PROJECT DETAILS

The project involves the funding and project management of a minimum of 30 000 Smartmeters (15,000 electricity meters and 15,000 water meters) in the Dawid Kruiper Municipality's jurisdiction

scalable accommodating an initial $\pm 30,000$ meters (15,000 electricity meters and 15,000 water meters) up and until 100,000 meters, ultimately reading all the electricity and water meters. All customer data – Munsoft account number; Account holder name, Addresses, Contact details, GPS co-ordinates of meter (amongst others) – for the municipality customers shall be stored on the Meter Data Management System (MDMS) metering database. The bidder must be able to diagnose and report on metering faults and problems; and the faults log to be viewed and managed by the service provider and municipal staff.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
