NUMBER

1. INTRODUCTION AND PURPOSE (Q69-02-2025-26)

Quotation to appoint a service provider to conduct a bulk density survey (dynamic cone penetrometer testing) and volumetric survey at Power Stations.

2. BACKGROUND

Rooiwal power station is owned and operated by the City of Tshwane. Rooiwal power station is made up of five (5) turbo-generator units, each rated at 60 MW. A generating unit is made up of a pulverized fuel fired water tube boiler, turbine, generator, generator transformer and all related auxiliaries.

The coal used to fire the boilers is stored in a coal stockpile. It is necessary to ensure that the construction of the coal stockpile, along with the methodology used, meets proper safety parameters with regards to construction, compaction, and compaction and also to ensure that safe internal conditions prevail in order to prevent spontaneous combustion of the coal.

Regular monitoring of stockpiles is essential, as the purpose of regular monitoring results in a safe product and ensuring the safe storage of the coal. Safety tests are of paramount importance throughout the year, as ambient temperatures can increase within the stockpile which can only be detected by temperature and gas tests.

Penetrometer tests allow for the measurement of the degree of compaction or natural compaction. The gas tests include the detection of Carbon Dioxide, Carbon Monoxide and Oxygen are used to determine whether self-heating is taking place, and to ascertain to what extent the below surface atmosphere is inert. The temperature tests indicate the presence of possible hot-spots, or self-heating which cannot always be visibly detected and can only be determined by monitoring and testing.

There are two coal stock piles for Rooiwal Power Station, one at Rooiwal Power Station and the other at Pretoria West Power Station. A volumetric survey is done for accounting and audit purposes, measuring the volume of coal stockpiles at the end of each financial year.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.

- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
