**1. Background to the National Museum**

The National Museum - a natural history, cultural history and art museum was established in 1877 and is a declared cultural institution, which resorts under the Department of Arts and Culture and is governed by a council. The mission of the National Museum is to provide heritage resources and an enjoyable experience to all people through quality research, conservation, education and exhibitions. More information about the organisation can be found at [www.nasmus.co.za](http://www.nasmus.co.za)

**2. Purpose and Background**

Controlling the environmental factors at the Oliewenhuis Art Museum is one of the primary preventative conservation functions to ensure heritage investments are not unnecessarily damaged and to slow down the aging of collections. As a cornerstone of museum operations, the maintenance of environmental conditions is outlined by the International Council of Museums (ICOM) and the International Institute for Conservation of Historic and Artistic Works (ICC) to be benchmarked according to set parameters.

Therefore, temperature and humidity are regularly measured and recorded in the museum and exhibition gallery areas to assist in the preservation and conservation of heritage objects/ items. In addition, Dataloggers identify risks measured against parameters for environmental conditions in an art museum and recommends adjustments where applicable. These measuring devices are helpful in identifying when action needs to be taken to avoid any damage to heritage assets.

## **7 BBBEE Assessment**

Preferential procurement calculation 80/20, whereby 80 is for price and 20 points for BBBEE points.

### **Preference Point System**

In accordance with the Preferential Procurement Regulations of 2022, NM has determined the following specific goals for which preference points will be awarded:

#### **Goal 1: Broad-Based Black Economic Empowerment**

Section 10 of the B-BBEE Act enjoins every public entity to take into account and apply the B-BBEE Codes of Good Practice in determining and implementing a preferential procurement policy. NM will thus award preference points to suppliers based on their B-BBEE specific preferential goals

#### **Goal 2: Empowerment of Local Businesses**

NM is located in the Free State, a rural province on the margins of economic activity. In an effort to develop and empower local businesses based in the Free State, NM will award preference point to suppliers based in the Free State.

#### **Goal 3: Youth Empowerment**

Youth participation in the economy is crucial for the growth and development of the South African economy, but their participation has been limited by several factors. One of the main challenges for youth has been the high levels of unemployment. The unemployment rate for young people in South Africa is much higher than the national average, which makes it difficult for them to enter the labour market and participate in the economy.

In an effort to empower youth and encourage their participation in the economy, NM will award preference points to businesses which are at least 51% owned by youth.

#### **Goal 4: Women Empowerment**

Women participation in the economy is crucial for the growth and development of the South African economy, but their participation has been limited by several factors. For women, the challenge has been unequal access to economic opportunities, including education, training, and employment. Women in South Africa often face discrimination and gender-based violence, which can limit their ability to participate in the economy. Additionally, women tend to be concentrated in low-paying, informal sector jobs, which offer little security and limited opportunities for advancement.

In an effort to empower women and encourage their participation in the economy, NM will award preference points to businesses which are at least 51% owned by women.

#### **Goal 5: Empowerment of People with Disabilities**

People with disabilities face significant barriers to participating in the South African economy. According to the World Bank, about seven million South Africans have some form of disability, and they are more likely to experience poverty and unemployment compared to those without disabilities.

People with disabilities often face discrimination in the labour market and have limited access to education, training, and employment opportunities. They may also face physical and attitudinal barriers, making it difficult for them to fully participate in the economy.

In an effort to empower people with disabilities and encourage their participation in the economy, NM will award preference points to businesses which are at least 51% owned by people with disabilities.

### Points awarded for each goal
