PART B – SPECIFICATIONS AND PRICING SCHEDULE

1. INTRODUCTION

Spatial Development Framework is a planning tool used to influence the overall spatial distribution of current and desired future land uses within a municipality in order to give effect to the vision, goals and objectives of the municipal Integrated Development Plan (IDP).

It should be noted that the process of development of a Spatial Development Framework is not intended to replace the existing IDP but will instead be informed by this framework. As such, the IDP and other municipal documents/plans that have been undertaken must be analyzed in order to inform the final Spatial Development Framework.

The Sakhisizwe Local Municipality intends to review the broad Spatial Development Framework that will guide future development within the municipal area. The SDF which has a set of objectives, strategies and policy guidelines that directs development and development options to ensure that the envisaged long term urban and rural structure and target deliverables are realized.

To this end the Sakhisizwe Local Municipality calls for proposals from professional teams for the reviewing of the Spatial Development Framework for Sakhisizwe Local Municipality. The primary purpose of the SDF is to create a competent municipal structure. The idea is to reflect the municipal wards of severe need and deprivation, of resource potential, of infrastructure endowment and of current and potential economic activity by describing key social, economic and natural trends and issues shaping the municipal geography.

2. BACKGROUND

An SDF has a longer time horizon than an IDP and therefore the SDF should provide the long-term spatial context for the IDP. The SDF is more than the spatial representation of the sector plans of IDP, it needs to set the spatial strategy. The key spatial plan of the SDF and the spatial perspective as well as the short term (5 year) spatial priorities should be incorporated in the IDP as the SDF sector plan.

Local municipalities have the functions and powers referred to in sections 156 and 229 of the Constitution. These powers include municipal planning, municipal infrastructure and municipal facilities, and municipal fiscal powers and functions but excluding those functions and powers vested in the District municipality where these areas located. Municipal planning includes all spatial planning and development control within their respective municipal boundary.

Section 26 (e) of the Local Government: Municipal Systems Act, No. 32 of 2000 (MSA) requires all municipalities to compile Spatial Development Frameworks (SDF) as a core component of Integrated Development Plans (IDP). Chapter 4 of The Spatial Planning and Land Use Management Act of 2013 also requires that L/SDFs be formulated. Therefore, the municipality seeks for the experienced and reputable professional planners to be appointed by the municipality to review the Sakhisizwe Spatial Development Framework to be implemented for the next 5 years.

The Sakhisizwe Spatial Development Framework shall adhere to the adopted SDF guidelines developed by the Department of Rural Development and Land Reform. The Sakhisizwe SDF must also form part of the Spatial Planning and Land Use Management Act Regulations and National SDF.

3. PURPOSE

The purpose of this document is to set out the terms of reference on which professional teams should base their project proposals for the preparation of the Review of the Spatial Development Framework for the Sakhisizwe Local Municipality. Project proposals should clearly state the approach to be adopted, the proposed methodology, relevant experience, time frame, program and associated budget and the proposed team members.
