**Annexure B****Scope of Services for the supply of Airship flight services for Radar Flight Trials over a period of 2 years****RFP No.1213/18/02/2026****1. INVITATION FOR PROPOSAL**

Proposals are hereby invited that have a proven track record for the supply of Airship flight services for Radar Flight Trials on an “As Required” basis over a period of 2 years.

The purpose of the Request for Proposal (RFP) is to obtain capability, pricing and general information on the business of potential Contractors for the CSIR to determine the Contractor most capable of providing the service.

This RFP document details and incorporates, as far as possible, the tasks and responsibilities of the potential bidder required by the CSIR.

This RFP does not constitute an offer to do business with the CSIR, but merely serves as an invitation to bidder(s) to facilitate a requirements-based decision process.

Responses to this Request for Proposal (RFP) (hereinafter referred to as a Bid or a Proposal) are requested from suitably qualified entities with a proven track record (hereinafter referred to as a Respondent or Bidder) for the provision of the required services which complies to the requirements as described below.

The CSIR needs to perform functional and performance verification testing of airborne radar sensors from time to time on an as required basis. Airship technology that provides a low-risk environment for equipment and personnel is required to evaluate and demonstrate the performance of Radar sensors.

The capabilities and services required from the supplier for this purpose is listed and described further in Section 3.1 “Scope of Work”

  - a. Able to carry at least an 25 kg payload consisting of the Radar payload, batteries, and auxiliary equipment.
  - b. Able to fly at an altitude of at least 200m above ground level
  - c. Able to survive wind speeds of up to 20 knots
  - d. Able to accurately repeat the same flight path within tolerance specified.
2. Provision of a Gigabit Ethernet data link for both data and control of the radar payload
  - a. Note that data rates can be adjusted but should achieve minimum of 40 mbit/second when flown in visual range of the operator station
  - b. Ideally a ground station link with a directional antenna that follows the airship should be deployed to ensure both high bandwidth and the lowest risk of any interference with other systems in the area
  - c. Radios should not be operated in the 5 GHz to 6 GHz range as this is the range where the radars being tested operates
3. Provision of the following services are required (per flight test as agreed):
  - a. Design and manufacture the interface to mount the Radar to the Airship. (The interface structure is assumed to be part of the Airship itself and not included in Payload mass)
  - b. Flight safety verification and demonstration of the Airship with a representative dummy mass for the payload
  - c. Verification testing of the Gigabit Ethernet communication interface
  - d. Installation of the Radar Sensor, batteries, Inertial Measurement Unit, etc to the Airship and integration with communication link
  - e. Provision of required licenced pilot and other required personnel to execute a 3 day measurement campaign where the performance of the radar as payload on the airship will be evaluated under different conditions.
  - f. It will be the supplier's responsibility to:
    - i. Operate the airship

- ii. Provide data link access to the radar
- iii. Ensure flight safety and safe operation of the airship
- iv. Execute various flight patterns as required including
  - 1. Loitering in place
  - 2. Flying a circular path
  - 3. Flying along particular linear targets of interest
  - 4. Executing the flight plans at different altitudes
- 4. Has access to a test site where the radar sensor capabilities can be evaluated.
  - a. Ideal test site will provide radar coverage of the following features within 5km from test site: Train tracks, roads, agricultural activity, mountainous terrain, accessible to deploy test targets such as corner reflectors.
- 5. Allow the CSIR to capture marketing material of the radar measurements
- 6. Provide access for CSIR personnel and a comfortable working environment for the 3 days at the test site

### 3.2. Minimum Specifications Compliance Matrix
